Q4 2014 Prices

New World Resources Plc ('NWR') and New World Resources N.V. today announce that NWR reached agreements with its customers for coking coal prices for the fourth quarter of 2014.

The average agreed price for coking coal deliveries in the fourth quarter of 2014 is EUR 85 per tonne, a 4 per cent increase compared to the third quarter of 2014 realised price of EUR 82 per tonne.

This average coking coal price is based on the expectation that coking coal sales for the fourth quarter of 2014 will be split approximately 37 per cent hard coking coal (mid-volatility), 47 per cent semi-soft coking coal and 16 per cent PCI coking coal.

As previously announced, sales of thermal coal production have been agreed at an average price of EUR 54 per tonne for the full year 2014.

Notice

All prices are expressed as blended averages between the different qualities both for coking and thermal coal and are ex-works.

All of the announced prices are indicative prices, and are based on an exchange rate of EUR/CZK of 27.0. A range of factors including, but not limited to, exchange rate fluctuations, quality mix, timing of the deliveries and flexible provisions in the individual agreements, may influence final realised prices. The actual realised price for the period may therefore differ from the average prices announced.
