CEZ GROUP
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
AS OF DECEMBER 31, 2016

1. The Company

ČEZ, a. s. ("ČEZ" or "the Company"), business registration number 45274649, is a Czech Republic joint-stock company, owned 69.8% (70.3% of voting rights) at December 31, 2016 by the Czech Republic represented by the Ministry of Finance. The remaining shares of the Company are publicly held. The address of the Company's registered office is Duhová 2/1444, Praha 4, 140 53, Czech Republic.

The Company is a parent company of the CEZ Group ("the Group"). Main business of the Group is the production, distribution, trade and sale of electricity and heat, trade and sale of natural gas and coal mining (see Note 9). ČEZ is an electricity generation company, which in 2016 produced approximately 54% of the electricity and a portion of the district heating in the Czech Republic. In the Czech Republic the Company operates eleven fossil fuel plants, sixteen hydroelectric plants, one solar plant, one combined cycle gas turbine plant and two nuclear plants. The Company also operates through its subsidiaries several power plants (fossil fuel, hydro, wind, solar, biogas, biomass) in the Czech Republic, nine wind power plants in Germany, two fossil fuel plants and two hydroelectric plants in Poland, one solar plant and one biomass plant in Bulgaria and a wind farm and a complex of hydroelectric plants in Romania. Further the Group also controls certain electricity distribution companies in the Czech Republic, Bulgaria and Romania. The average number of employees of the Company and its consolidated subsidiaries was 26,300 and 25,822 in 2016 and 2015, respectively.

Responsibility for public administration in the energy sector is exercised by the Ministry of Industry and Trade (the "Ministry"), the Energy Regulatory Office and the State Energy Inspection Board.

The Ministry, as the central public administration body for the energy sector, issues state approval to construct new energy facilities in accordance with specified conditions, develops the energy policy of the state and ensures fulfillment of obligations resulting from international treaties binding on the Czech Republic or obligations resulting from membership in international organizations.

The Energy Regulatory Office was established as the administrative office to exercise regulation in the energy sector of the Czech Republic, to support economic competition and to protect consumers' interests in sectors where competition is not possible. The Energy Regulatory Office decides on the granting of a license, imposition of the supply obligation beyond the scope of the license, imposition of the obligation to let another license holder use energy facilities in cases of emergency, to exercise the supply obligation beyond the scope of the license and price regulation based on special legal regulations. The State Energy Inspection Board is the inspection body supervising the activities in the energy sector. All customers can select their suppliers of electricity.

2. Summary of Significant Accounting Policies

2.1. Financial Statements

These consolidated financial statements of the Group were prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU.

The financial statements are prepared under the historical cost convention, except when IFRS require other measurement basis as disclosed in the accounting policies below.

2.2. Group Accounting

a. Group Structure

The financial statements of CEZ Group include the accounts of ČEZ, a. s., its subsidiaries and joint-ventures, which are shown in the Note 9.

b. Subsidiaries

Subsidiaries are those entities which the Group controls. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases.

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are recognized in profit or loss as incurred.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability are recognized in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Changes in the fair value of contingent consideration classified as equity are not recognized.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired ("negative goodwill"), then the Group first reassesses the identification and measurement of the acquiree's identifiable assets, liabilities and contingent liabilities and the measurement of the cost of the combination. Any excess remaining after the reassessment is recognized immediately in profit or loss.

A change in the ownership interest of a subsidiary, without loss of control, is accounted as an equity transaction.

Losses within a subsidiary incurred are attributed to the non-controlling interest even if that results in a deficit balance.

Put options held by non-controlling interests are recorded as a derecognition of non-controlling interest and recognition of a liability at the end of the reporting period. The liability is recognized at the present value of the amount payable on exercise, and any difference between the amount of non-controlling interest derecognized and this liability is accounted for within equity. Subsequent changes to the present value of the amount payable on exercise are recorded directly in equity.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated; unrealized losses are also eliminated unless cost cannot be recovered. Accounting policies of subsidiaries have been changed, where necessary, to ensure consistency with the policies adopted by the Group.

c. Associates

Associates are entities over which the Group generally has between 20% and 50% of the voting rights, or over which the Group has significant influence, but which it does not control. Investments in associates are accounted for by the equity method of accounting. Under this method the Group's share of the post-acquisition profits or losses of associates is recognized in the income statement and its share of other post-acquisition movements in equity of associates is recognized in other comprehensive income. The cumulative post-acquisition movements are adjusted against the cost of the investment. Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. The Group's investment in associates includes goodwill (net of accumulated impairment losses) on acquisition. When the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognize further losses, unless the Group has incurred obligations or made payments on behalf of the associates.

d. Joint-ventures

A joint-venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint-venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. The considerations made in determining significant influence or joint control are similar to those necessary considerations to determine control over subsidiaries. The Group recognizes its interest in the joint-venture using the equity method of accounting (see Note 2.2.c).

The financial statements of the joint-venture are prepared for the same reporting period as the parent company. Adjustments are made where necessary to bring the accounting policies into line with those of the Group. Adjustments are made in the Group's financial statements to eliminate the Group's share of unrealized gains and losses on transactions between the Group and its jointly controlled entity. Losses on transactions are recognized immediately if the loss provides evidence of a reduction in the net realizable value of current assets or an impairment loss.

e. Transactions Involving Entities under Common Control

Acquisitions of subsidiaries from entities under common control are recorded using a method similar to pooling of interests.

The assets and liabilities of the acquired subsidiaries are included in the consolidated financial statements at their book values. The difference between the cost of acquisition of subsidiaries from entities under common control and the share of net assets acquired in book values is recorded directly in equity.

2.3. Changes in Accounting Policies

a. Adoption of New IFRS Standards in 2016

The accounting policies adopted are consistent with those of the previous financial year, except for as follows. The Group has adopted the following new or amended and endorsed by EU IFRS and IFRIC interpretations as of January 1, 2016:

Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception
The amendments to IFRS 10 clarify that the exemption from presenting consolidated financial statements applies to a parent entity that is a subsidiary of an investment entity, when the investment entity measures all of its subsidiaries at fair value. Furthermore, the amendments to IFRS 10 clarify that only a subsidiary of an investment entity that is not an investment entity itself and that provides support services to the investment entity is consolidated. All other subsidiaries of an investment entity are measured at fair value. The amendments to IAS 28 allow the investor, when applying the equity method, to retain the fair value measurement applied by the investment entity associate or joint-venture to its interests in subsidiaries. These amendments did not have impact to the Group's financial statements.

Amendments to IFRS 11 Joint Arrangements: Accounting for Acquisitions of Interests in joint operation
The amendments to IFRS 11 require that a joint operator accounting for the acquisition of an interest in a joint operation, in which the activity of the joint operation constitutes a business must apply the relevant IFRS 3 principles for business combinations accounting. The amendments also clarify that a previously held interest in a joint operation is not remeasured on the acquisition of an additional interest in the same joint operation while joint control is retained. In addition, a scope exclusion has been added to IFRS 11 to specify that the amendments do not apply when the parties sharing joint control, including the reporting entity, are under common control of the same ultimate controlling party. The amendments apply to both the acquisition of the initial interest in a joint operation and the acquisition of any additional interests in the same joint operation. These amendments did not have significant impact to the Group's financial statements.

Amendments to IAS 1 Disclosure Initiative

The amendments to IAS 1 Presentation of Financial Statements clarify, rather than significantly change, existing IAS 1 requirements.

The amendments clarify:

- the materiality requirements in IAS 1;
- that specific line items in the statement(s) of profit or loss and OCI and the balance sheet may be disaggregated;
- that entities have flexibility as to the order in which they present the notes to financial statements;
- that the share of OCI of associates and joint-ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss.

These amendments did not have a significant impact to the Group, but assist in applying judgment when meeting the presentation and disclosure requirements.

Amendments to IAS 16 and IAS 38: Clarification of Acceptable Methods of Depreciation and Amortization
The amendments clarify the principle in IAS 16 and IAS 38 that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortize intangible assets. These amendments did not have any impact to the Group given that the Group has not used a revenue-based method to depreciate its non-current assets.

Amendments to IAS 16 and IAS 41: Bearer Plants

The amendments change the accounting requirements for biological assets that meet the definition of bearer plants. Under the amendments, biological assets that meet the definition of bearer plants are no longer within the scope of IAS 41. Instead, IAS 16 applies. After initial recognition, bearer plants are measured under IAS 16 at accumulated cost (before maturity) and using either the cost model or revaluation model (after maturity). The amendments also require that produce that grows on bearer plants remains in the scope of IAS 41 measured at fair value less costs to sell. For government grants related to

bearer plants, IAS 20 Accounting for Government Grants and Disclosure of Government Assistance applies. These amendments did not have any impact to the Group as the Group does not have any bearer plants.

Amendments to IAS 27: Equity Method in Separate Financial Statements

The amendments allow entities to use the equity method to account for investments in subsidiaries, joint-ventures and associates in their separate financial statements. Entities already applying IFRS and electing to change to the equity method in its separate financial statements have to apply that change retrospectively. For first-time adopters of IFRS electing to use the equity method in its separate financial statements, they are required to apply this method from the date of transition to IFRS. These amendments did not have any impact on the Group's financial statements.

Annual Improvements to IFRSs 2010 - 2012

In December 2013 the IASB issued a collection of amendments to IAS and IFRS in which they focused on areas of inconsistency in IFRSs and IASs or where the clarification of wording was required. The following standards were amended:

IFRS 2	Share-based Payment
IFRS 3	Business Combinations
IFRS 8	Operating Segments
IFRS 13	Fair Value Measurement
IAS 16	Property, Plant and Equipment
IAS 24	Related Party Disclosures
IAS 38	Intangible Assets

Annual Improvements to IFRSs 2012 - 2014

In September 2014 the IASB issued a collection of amendments to IAS and IFRS in which they focused on areas of inconsistency in IFRSs and IASs or where the clarification of wording was required. The following standards were amended:

IFRS 5	Non-Current Assets Held for Sale and Discontinued Operations
IFRS 7	Financial Instruments: Disclosures
IAS 19	Employee Benefits
IAS 34	Interim Financial Reporting

These changes did not have significant impact on the Group's financial statements.

b. New IFRS Standards and IFRIC Interpretations either not yet Effective or not yet Adopted by the EU

The Group is currently assessing the potential impacts of the new and revised standards and interpretations that will be effective or adopted by the EU from January 1, 2017 or later. Standards and interpretations most relevant to the Group's activities are detailed below:

IFRS 9 Financial Instruments – Classification and measurement

The IFRS 9 was originally issued in November 2009 and is intended to replace IAS 39 Financial Instruments: Recognition and measurement. The standard introduces new requirements for classifying and measuring financial assets and liabilities. In October 2010 the IASB added to IFRS 9 the requirements for classification and measurement of financial liabilities and derecognition of financial assets and liabilities. Most of the requirements in IAS 39 for classification and measurement of financial liabilities and derecognition of financial assets and liabilities were carried forward unchanged to IFRS 9. The standard eliminates categories of financial instruments currently existing in IAS 39: available-for-sale and held-to-maturity. According to IFRS 9 all financial assets and liabilities are initially recognized at fair value plus transaction costs.

Financial assets

Debt instruments may, if the fair value option (FVO) is not applied, be subsequently measured at amortized cost if the following both conditions are met:

- the asset is held within a business model that has the objective to hold the assets to collect the contractual cash flows;
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding.

All other debt instruments, where the above mentioned conditions are not met, are subsequently measured at fair value.

All equity investment financial assets are measured at fair value either through other comprehensive income (OCI) or profit or loss. Equity instruments held for trading must be measured at fair value through profit or loss. Entities have an irrevocable choice of recognizing changes in fair value either in OCI or profit or loss by instrument for all other equity investment financial assets.

Financial liabilities

For FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss.

Impairment

The impairment requirements are based on an expected credit loss (ECL) model that replaces the IAS 39 incurred loss model. The ECL model applies to: debt instruments accounted for at amortized cost or at FVOCI; most loan commitments; financial guarantee contracts; contract assets under IFRS 15; and lease receivables under IAS 17 *Leases*.

Entities are generally required to recognize either 12-months or lifetime ECL, depending on whether there has been a significant increase in credit risk since initial recognition (or when the commitment or guarantee was entered into). For some trade receivables, the simplified approach may be applied whereby the lifetime expected credit losses are always recognized.

Hedge accounting

New chapter on hedge accounting has been added to IFRS 9. This represents a major overhaul of hedge accounting and puts in place a new model that introduces improvements principally by aligning the accounting more closely with risk management. There are also improvements to the disclosures about hedge accounting and risk management.

IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Retrospective application is required, but comparative information is not compulsory. The adoption of IFRS 9 will have an effect on the classification and measurement of the Group's financial assets and liabilities.

IFRS 14 Regulatory Deferral Accounts

IFRS 14 is an optional standard that allows an entity, whose activities are subject to rate-regulation, to continue applying most of its existing accounting policies for regulatory deferral account balances upon its first-time adoption of IFRS. Entities that adopt IFRS 14 must present the regulatory deferral accounts as separate line items on the balance sheet and present movements in these account balances as separate line items in the statement of profit or loss and other comprehensive income. The standard requires disclosures on the nature of, and risks associated with, the entity's rate-regulation and the effects of that rate-regulation on its financial statements. IFRS 14 is effective for annual periods beginning on or after January 1, 2016 but was not endorsed by EU yet. This new standard will not have significant impact on the Group's financial statements.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014. The standard outlines the principles an entity must apply to measure and recognize revenue. The core principle is that an entity will recognize revenue at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services to a customer.

The principles in IFRS 15 will be applied using a five-step model:

1. Identify the contract(s) with a customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognize revenue when (or as) the entity satisfies a performance obligation

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Group is currently assessing the impact of IFRS 15 and plans to adopt the new standard on the required effective date.

IFRS 16 Leases

The IASB issued in January 2016 new standard, IFRS 16 Leases, which replaces existing IFRS leases requirements and requires lessees to recognize most leases on their balance sheets while lessor accounting is substantially unchanged. The Group is currently assessing the impact of this new standard on its financial statements.

The new standard will be effective for annual periods beginning on or after January 1, 2019. Early application is permitted, provided the new revenue standard, IFRS 15 Revenue from Contracts with Customers, has been applied or is applied at the same date as IFRS 16. The standard has not yet been endorsed by EU. The Group is currently assessing the impact of IFRS 16 and plans to adopt the new standard on the required effective date.

Amendments to IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint-Venture

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint-venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3 Business Combinations, between an investor and its associate or joint-venture, is recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint-venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively. These amendments are not expected to have significant impact to the Group's financial statements.

IAS 7 Disclosure Initiative – Amendments to IAS 7

The amendments to IAS 7 Statement of Cash Flows are part of the IASB's Disclosure Initiative and require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. On initial application of the amendment, entities are not required to provide comparative information for preceding periods. These amendments are effective for annual periods beginning on or after January 1, 2017, with early application permitted. The standard has not yet been endorsed by EU. Application of amendments will result in additional disclosure provided by the Group.

IAS 12 Recognition of Deferred Tax Assets for Unrealized Losses – Amendments to IAS 12

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognized in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact. These amendments are effective for annual periods beginning on or after January 1, 2017 with early application permitted. The standard has not yet been endorsed by EU. If an entity applies the amendments for an earlier period, it must disclose that fact. These amendments are not expected to have material impact on the Group's financial statements.

IFRS 2 Classification and Measurement of Share-based Payment Transactions — Amendments to IFRS 2
The IASB issued amendments to IFRS 2 Share-based Payment that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. The amendments are effective for annual periods beginning on or after January 1, 2018, with early application permitted. The standard has not yet been endorsed by EU. The Group is assessing the potential effect of the amendments on Group's financial statements.

The Group does not expect early adoption of any of the above mentioned standards, improvements or amendments.

2.4. Estimates

The preparation of financial statements in conformity with International Financial Reporting Standards requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Explanation of key assumptions is included in relevant sections of notes where significant estimates are being described. Significant estimates are made by the Group while determining recoverable amounts for property, plant and equipment and intangible assets (see Note 7), accounting for the nuclear provisions (see Note 20.1), provisions for reclamation of mines, mining damages and waste storage reclamation (see Note 20.2), unbilled electricity (see Note 2.6), fair value of commodity contracts (see Notes 2.21 and 18) and financial derivatives (see Notes 2.20 and 18).

2.5. Revenues

The Group recognizes revenue from supplies of electricity and related services based on contract terms. Differences between contracted amounts and actual supplies are settled through the market operator.

Revenues are recognized, when it is probable that the economic benefits associated with the transaction will flow to the entity and the revenue can be reliably measured. Sales are recognized net of value added tax and discounts, if any.

Revenue from sale of goods is recognized when the goods are delivered and significant risks and rewards of ownership of the goods have passed to the buyer.

Revenue from services provided is recognized when the services are rendered.

Connection fees received from customers are recognized in income in the period when the fees are received. Connection fees received from customers prior 2009 are presented as deferred revenues in the line Other long-term liabilities.

2.6. Unbilled Electricity

Electricity supplied to customers, which is not yet billed, is recognized in revenues at estimated amounts. The estimate of monthly change in unbilled electricity is derived from the measured delivery of electricity after deduction of invoiced consumption and estimated grid losses. The estimate of total unbilled electricity balance is also supported by extrapolation of consumption in the last measured period for individual locations. The ending balance of unbilled electricity is disclosed net in the balance sheet after deduction of advances received from customers and is included in the line item of Receivables, net or Trade and other payables.

2.7. Fuel Costs

Fuel costs are expensed as fuel is consumed. Fuel expense includes the amortization of the cost of nuclear fuel (see Note 2.10).

2.8. Interest

The Group capitalizes all interest incurred in connection with its construction program that theoretically could have been avoided if expenditures for the qualifying assets had not been made. The qualifying assets include assets, for which the construction represents a substantial period of time. Capitalized interest costs amounted to CZK 2,989 million and CZK 3,623 million and the interest capitalization rate was 4.1% and 4.3% in 2016 and 2015, respectively.

2.9. Property, Plant and Equipment

Property, plant and equipment are recorded at cost, net of accumulated depreciation and impairment in value. Cost of plant in service includes materials, labor, payroll-related costs and the cost of debt financing used during construction. The cost also includes the estimated cost of dismantling and removing the asset and restoring the site, to the extent that is recognized as a provision under IAS 37, Provisions, Contingent Liabilities and Contingent Assets. Government grants received for construction of certain items of property, plant and equipment decrease the acquisition cost of the respective items.

Internally developed property, plant and equipment are recorded at their accumulated cost. The cost of maintenance, repairs, and replacement of minor items of property is charged to maintenance expense when incurred. Renewals and improvements are capitalized. Upon sale, retirement or replacement of part of an item of property, plant and equipment, the cost, related accumulated depreciation and eventual impairment of the disposed item or its replaced part are derecognized from the balance sheet. Any resulting gains or losses are included in profit or loss.

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. Where an indicator of impairment exists, the Group reviews the recoverable amounts of its property, plant and equipment to determine whether such amounts continue to exceed the assets' carrying values. The recoverable amount of an asset is the higher of its fair value less costs of disposal and its value in use. Identified impairment of property, plant and equipment is recognized directly in profit or loss in the line item Impairment of property, plant and equipment and intangible assets including goodwill.

At each reporting date, an assessment is made whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss in the line item Impairment of property, plant and equipment and intangible assets including goodwill.

The Group depreciates the original cost of property, plant and equipment less its residual value by using the straight-line method over the estimated economic lives. Each part of an item of property, plant and

equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. The depreciable useful lives used for property, plant and equipment are as follows:

	Useful lives (years)
Buildings and structures	20 – 50
Machinery and equipment	4 – 25
Vehicles	8 – 25
Furniture and fixtures	4 – 15

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year end.

Depreciation of plant in service was CZK 27,569 million and CZK 27,146 million for the years ended December 31, 2016 and 2015, which was equivalent to a composite depreciation rate of 3.7% and 3.9%, respectively.

2.10. Nuclear Fuel

Nuclear fuel is stated at original cost, net of accumulated amortization and presented as part of property, plant and equipment. Amortization of fuel in the reactor is based on the amount of power generated. Amortization of nuclear fuel charged to fuel expense was CZK 3,158 million and CZK 3,416 million for the years ended December 31, 2016 and 2015, respectively. The amortization of nuclear fuel includes charges in respect of additions to the accumulated provision for interim storage of spent nuclear fuel in the amount of CZK 219 million and CZK 328 million in 2016 and 2015, respectively. The balance of nuclear fuel includes the capitalized portion of the provision for interim storage of nuclear fuel.

2.11. Intangible Assets

Intangible assets are valued at their acquisition costs and related expenses. Intangible assets are amortized over their useful lives using the straight-line method. The estimated useful life of intangible assets ranges from 3 to 25 years. The assets' residual values, useful lives and amortization methods are reviewed, and adjusted if appropriate, at each financial year end. Improvements are capitalized.

Research and development costs, net of grants and subsidies received, that are not eligible for capitalization have been expensed in the period incurred and amounted to CZK 369 million in 2016 and CZK 351 million in 2015.

Intangible assets are tested for impairment (for goodwill see Note 2.12) whenever facts or changes in circumstances indicate that the carrying amount could be impaired. The recoverable amount of an intangible asset not yet available for use is tested for impairment annually, irrespective of whether there is any indication that it may be impaired. Identified impairment of intangible assets is recognized directly in profit or loss in the line item Impairment of property, plant and equipment and intangible assets including goodwill.

For assets excluding goodwill an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss in the line item Impairment of property, plant and equipment and intangible assets including goodwill.

2.12. Goodwill

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identifiable assets acquired and liabilities assumed (see Note 2.2). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill on acquisitions of associates and joint-ventures is included in investments in associates and joint-ventures. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

As at the acquisition date, any goodwill acquired is allocated to each of the cash-generating units expected to benefit from the combination's synergies. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets. Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which the goodwill relates. Where recoverable amount of the cash-generating unit is lower than the carrying amount, an impairment loss is recognized. Impairment losses of goodwill cannot be reversed in subsequent periods. Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in these circumstances is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained.

2.13. Emission Rights

Emission right represents the right of the operator of a facility, which in the course of its operation emits greenhouse gases, to emit during the calendar year equivalent of one ton of carbon dioxide. Based on the National Allocation Plans certain companies of the Group have been granted emission rights. These companies are responsible for determining and reporting the amount of greenhouse gases produced by its facilities in the calendar year and this amount has to be audited by an authorized person.

On April, 30 of the following year, at the latest, these companies are required to remit a number of allowances representing the number of tones of CO₂ actually emitted in previous year.

The emission rights which were granted free of charge are stated at their nominal value, i.e. at zero. Purchased emission rights are carried at cost (except for emission rights for trading). Emission rights acquired in a business combination are initially recognized at their fair value at the date of acquisition and subsequently treated similarly to purchased emission rights. The Group recognizes a provision to cover emissions made. This provision is measured firstly with regard to the cost of emission rights resulting from hedging strategy, and then considering granted and purchased emission rights and credits up to the level of granted and purchased emission rights and credits held and then at the market price ruling at the balance sheet date.

The Group also holds emission rights for trading purposes. The portfolio of emission rights held for trading is measured at fair value. The changes in fair value of the emission rights held for trading are recognized directly in profit or loss.

At each reporting date, the Group assesses whether there is any indication that emission rights may be impaired. Where an indicator of impairment exists, the Group reviews the recoverable amounts of the cash-generating units, to which the emission rights were allocated, to determine whether such amounts continue to exceed the assets' carrying values. Any identified impairment of emission rights is recognized directly in profit or loss in the line item of Emission rights, net.

Sale and repurchase agreements with emission rights are accounted for as collateralized borrowing.

Green and similar certificates are initially recognized at fair value and subsequently treated similarly to purchased emission rights.

2.14. Investments

Investments are classified into the following categories: held-to-maturity, loans and receivables, held for trading and available-for-sale. Investments with fixed or determinable payments and fixed maturity that the Group has the positive intent and ability to hold to maturity other than loans and receivables originated by the Group are classified as held-to-maturity investments. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

Investments acquired principally for the purpose of generating a profit from short-term fluctuations in price are classified as held for trading. All other investments, other than loans and receivables originated by the Group, are classified as available-for-sale.

Held-to-maturity investments, loans and receivables are included in non-current assets unless they mature within 12 months of the balance sheet date. Investments held for trading are included in current assets. Available-for-sale investments are classified as current assets if the Group intends to realize them within 12 months of the balance sheet date or if there is no reasonable certainty that the Group will hold the available-for-sale investments for more than 12 months of the balance sheet date.

All purchases and sales of investments are recognized on the settlement date.

When financial assets are recognized initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

Available-for-sale and trading investments are subsequently carried at fair value without any deduction for transaction costs by reference to their quoted market price at the balance sheet date.

Gains or losses on remeasurement to fair value of available-for-sale investments are recognized directly in other comprehensive income, until the investment is sold or otherwise disposed of, or until it is determined to be impaired. Equity securities classified as available-for-sale investments that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured, are measured at cost.

The carrying amounts of available-for-sale investments are reviewed at each balance sheet date whether there is objective evidence for impairment. In the case of equity investments classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the income statement – is removed from other comprehensive income and recognized in the income statement. Impairment losses on equity investments are not reversed through the income statement; increases in their fair value after impairment are recognized directly in other comprehensive income. In the case of debt instruments classified as available-for-sale, the amount recorded for impairment is the cumulative loss measured as the difference between the amortized cost and the current fair value, less any impairment loss on that investment previously recognized in the income statement. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the income statement, the impairment loss is reversed through the income statement.

Changes in the fair values of trading investments are included in Other financial expenses or Other financial income.

Held-to-maturity investments and loans and receivables are carried at amortized cost using the effective interest rate method.

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.15. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, current accounts with banks and short-term bank notes with a maturity of 6 months or less. Foreign currency deposits are translated using the exchange rates published as at the balance sheet date.

2.16. Financial Assets Restricted in Use

Restricted balances of cash and other financial assets, which are shown as restricted funds (see Note 4), relate to mining reclamation and damages, deposits for waste storage reclamation, funding of nuclear decommissioning liabilities and cash guarantees given to transaction partners. The non-current classification is based on the expected timing of the release of the funds to the Group.

2.17. Receivables, Payables and Accruals

Receivables are recognized and carried at original invoice amount less an allowance for any uncollectible amounts. An impairment analysis of receivables is performed by the Group at each reporting date on an individual basis for significant specific receivables. In addition, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively where the individual approach is not applicable. The calculation is based on actual incurred historical data of these groups.

Payables are recorded at invoiced values and accruals are reported at expected settlement values.

2.18. Materials and Supplies

Purchased inventories are valued at actual cost, using the weighted average method. Costs of purchased inventories comprise expenses which have been incurred in respect of the acquisition of materials and supplies including transportation costs. When consumed, inventories are charged to income or capitalized as part of property, plant and equipment. Work-in-progress is valued at actual cost. Costs of inventories produced internally include direct material and labor costs. Obsolete inventories are reduced to their realizable value by a provision charged to the income statement. At December 31, 2016 and 2015 the provision for obsolescence amounted to CZK 1,096 million and CZK 516 million, respectively.

2.19. Fossil Fuel Stocks

Fossil fuel stocks are stated at actual cost using weighted average cost method.

2.20. Derivative Financial Instruments

The Group uses derivative financial instruments such as foreign currency contracts and interest rate swaps to hedge its risks associated with interest rate and foreign currency fluctuations. Such derivative financial instruments are stated at fair value. In the balance sheet such derivatives are presented as part of Investments and other financial assets, net, Other financial assets, net, Other long-term liabilities and Trade and other payables.

The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

For the purpose of hedge accounting, hedges are classified as either fair value hedges when they hedge the exposure to changes in the fair value of a recognized asset or liability; or cash flow hedges when they hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction.

The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis,

of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

a. Fair value hedge

Gain or loss from re-measuring the hedging instrument at fair value is recognized immediately in the income statement. Any gain or loss on the hedged item attributable to the hedged risk is adjusted against the carrying amount of the hedged item and recognized in the income statement. Where the adjustment is to the carrying amount of a hedged interest-bearing financial instrument, the adjustment is amortized to profit or loss over the remaining term to maturity.

b. Cash flow hedge

Changes in the fair value of derivatives that are designated and qualify as cash flow hedges are initially recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized in the income statement in the line item Other financial expenses or Other financial income.

Amounts accumulated in equity are transferred to the income statement in the periods when the hedged item affects profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recorded to the income statement when the forecast transaction is ultimately recognized. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

c. Other derivatives

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instruments that do not qualify for hedge accounting are recognized immediately in the income statement.

2.21. Commodity Contracts

According to IAS 39, certain commodity contracts are treated as financial instruments and fall into the scope of the standard. Most commodity purchase and sales contracts entered into by the Group provide for physical delivery of quantities intended to be consumed or sold as part of its ordinary business; such contracts are thus excluded from the scope of IAS 39.

In particular, forward purchases and sales for physical delivery of energy are considered to fall outside the scope of application of IAS 39, when the contract concerned is considered to have been entered into as part of the Group's normal business activity. This is demonstrated to be the case when all the following conditions are fulfilled:

- A physical delivery takes place under such contracts;
- The volumes purchased or sold under the contracts correspond to the Group's operating requirements;
- The contract cannot be considered as a written option as defined by the standard IAS 39. In the specific case of electricity sales contracts, the contract is substantially equivalent to a firm forward sale or can be considered as a capacity sale.

The Group thus considers that transactions negotiated with a view to balancing the volumes between electricity purchases and sale commitments are part of its ordinary business as an integrated electric utility company and do not therefore come under the scope of IAS 39.

Commodity contracts which fall under the scope of IAS 39 are carried at fair value with changes in the fair value recognized in the income statement. The Group presents revenues and expenses related to commodity trading net in the line Gains and losses from commodity derivative trading, net.

2.22. Income Taxes

The provision for corporate tax is calculated in accordance with the tax regulations of the states of residence of the Group companies and is based on the income or loss reported under local accounting regulations, adjusted for appropriate permanent and temporary differences from taxable income. Income taxes are calculated on an individual company basis as the Czech tax laws do not permit consolidated tax returns. For companies located in the Czech Republic income taxes are provided at a rate of 19% for the years ended December 31, 2016 and 2015, respectively, from income before income taxes after adjustments for certain items which are not deductible, or taxable, for taxation purposes. The Czech corporate income tax rate enacted for 2017 and on is 19%.

Deferred income tax is provided, using the liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax is determined using tax rates (and laws) that have been enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets and liabilities are recognized regardless of when the temporary difference is likely to reverse. Deferred tax assets and liabilities are not discounted. A deferred tax liability is recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the reported net income nor taxable profit or loss
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint-ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred tax assets and liabilities of Group companies are not offset in the balance sheet.

Current tax and deferred tax are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly to equity.

Change in the carrying amount of deferred tax assets and liabilities due to change in tax rate is recognized in the income statement, except to the extent that it relates to items previously charged or credited to equity.

2.23. Long-term Debt

Borrowings are initially recognized at the amount of the proceeds received, net of transaction costs. They are subsequently carried at amortized cost using the effective interest rate method, the difference between net proceeds and redemption value is being recognized in the net income over the life of the borrowings as interest expense.

Transaction costs include fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges.

The carrying amount of long-term debt, which is hedged against the changes in its fair value, is adjusted by the changes in the fair value attributable to the hedged risk. The changes in the fair value of the hedged long-term debt are recognized in profit or loss and are included in the income statement line Other financial expenses or Other financial income. The adjustment to the carrying amount of the hedged long-term debt in a fair value hedge is subsequently amortized to profit or loss using the effective interest rate method.

2.24. Nuclear Provisions

The Group has recognized provisions for its obligations to decommission its nuclear power plants at the end of their operating lives, to store the related spent nuclear fuel and other radioactive waste initially on an interim basis and provision for its obligation to provide financing for subsequent permanent storage of spent fuel and irradiated parts of reactors (see Note 20.1).

The provisions recognized represent the best estimate of the expenditures required to settle the present obligation at the current balance sheet date. Such cost estimates, expressed at current price levels at the date of the estimate, are discounted at December 31, 2016 and 2015 using a long-term real rate of interest of 1.5% per annum to take into account the timing of payments. The initial discounted cost amounts are capitalized as part of property, plant and equipment and are depreciated over the period when the nuclear power plants generate electricity. Each year, the provisions are increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with the charges being recognized as a component of interest expense. At December 31, 2016 and 2015 the estimate for the effect of inflation is 1%.

The decommissioning process is expected to continue for approximately a fifty-year period subsequent to the final operation of the plants. It is currently anticipated that the permanent storage facility will become available in 2065 and the process of final disposal of the spent nuclear fuel will then continue until approximately 2084 when the process should be finished. While the Group has made its best estimate in establishing its nuclear provisions, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning and fuel storage activities, the ultimate provision requirements could vary significantly from the Group's current estimates.

Changes in a decommissioning liability and in liability for final storage of spent nuclear fuel that result from a change in the current best estimate of timing and/or amount of cash flows required to settle the obligation or from a change in the discount rate are added to (or deducted from) the amount recognized as the related asset. However, to the extent that such a treatment would result in a negative asset, the effect of the change is recognized in the income for the current period.

2.25. Provisions for Decommissioning and Reclamation of Mines and Mining Damages

The Group has recognized provisions for obligations to decommission and reclaim mines at the end of their operating lives (see Note 20.2). The provisions recognized represent the best estimate of the expenditures required to settle the present obligation at the current balance sheet date. Such cost estimates, expressed at current price levels, are discounted at December 31, 2016 and 2015 using a long-term real rate of interest of 1.5% per annum to take into account the timing of payments. The initial discounted cost amounts are capitalized as part of property, plant and equipment and are depreciated over the lives of the mines. Each year, the provisions are increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with the charges being recognized as a component of interest expense. At December 31, 2016 and 2015 the estimate for the effect of inflation is 1%.

Changes in a decommissioning liability that result from a change in the current best estimate of timing and/or amount of cash flows required to settle the obligation or from a change in the discount rate are added to (or deducted from) the amount recognized as the related asset. However, to the extent that such a treatment would result in a negative asset, the effect of the change is recognized in the income for the current period.

2.26. Exploration for and Evaluation of Mineral Resources

Expenditures on exploration for and evaluation of mineral resources are charged to expense when incurred.

2.27. Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date or whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys the right to use the asset. A reassessment is made after inception of the lease only if one of the following conditions applies:

- There is a change in contractual terms, other than a renewal or extension of the arrangement;
- A renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- There is a change in determination of whether fulfillment is dependent on a specified asset; or
- There is a substantial change to the asset.

Where reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment.

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income.

Capitalized leased assets are depreciated over the estimated useful life of the asset. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset is fully depreciated over the shorter of the lease term or its useful life.

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term.

2.28. Treasury Shares

Treasury shares are presented in the balance sheet as a deduction from equity. The acquisition of treasury shares is presented in the statement of equity as a reduction in equity. No gain or loss is recognized in the income statement on the sale, issuance, or cancellation of treasury shares. Consideration received is presented in the financial statements as an addition to equity.

2.29. Share Options

Members of Board of Directors and selected managers have been granted options to purchase common shares of the Company. Expense related to the share option plan is measured on the date of the grant by reference to the fair value of the share options granted. In case of options, which vest immediately, the expense is recognized directly in profit or loss with a corresponding increase in equity. In all other cases the expense is accrued over the vesting period of the equity instruments granted. The expense recognized reflects the best estimate of the number of share options, which will ultimately vest. In 2016 and 2015 the expense recognized in respect of the share option plan amounted to CZK 22 million and CZK 31 million, respectively.

2.30. Translation of Foreign Currencies

The consolidated financial statements are presented in Czech crowns (CZK), which is the Company's functional and presentation currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement, except when deferred in equity for qualifying cash flow hedges.

Translation differences on debt securities and other monetary financial assets measured at fair value are included in foreign exchange gains and losses. Translation differences on non-monetary items such as equity instruments held for trading are reported as part of the fair value gain or loss. Translation differences on equity securities available-for-sale are included in equity.

The assets and liabilities of foreign subsidiaries are translated at the rate of exchange ruling at the balance sheet date. The income statements items of foreign subsidiaries are translated at average exchange rates for the year. The exchange differences arising on the retranslation are taken directly to other comprehensive income. On disposal of a foreign entity, accumulated exchange differences are recognized in the income statement as a component of the gain or loss on disposal.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign operation and are translated at the closing exchange rate.

Exchange rates used as at December 31, 2016 and 2015 for the translation of assets and liabilities denominated in foreign currencies were as follows:

	2016	2015
CZK per 1 EUR	27.020	27.025
CZK per 1 USD	25.639	24.824
CZK per 1 PLN	6.126	6.340
CZK per 1 BGN	13.815	13.819
CZK per 1 RON	5.953	5.976
CZK per 100 JPY	21.907	20.619
CZK per 1 TRY	7.286	8.509

2.31. Non-current Assets Held for Sale

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Property, plant and equipment and intangible assets classified as held for sale are not depreciated or amortized.

3. Property, Plant and Equipment

Net plant in service at December 31, 2016 and 2015 is as follows (in CZK millions):

	Buildings	Plant and Equipment	Land and Other	Total
Cost at January 1, 2015	264,714	429,452	7,150	701,316
Additions	9,093	13,121	231	22,445
Disposals	(937)	(3,992)	(33)	(4,962)
Change in capitalized part of provisions	10	2,829	860	3,699
Reclassification and other	(5)	7	(2)	-
Currency translation differences	(1,246)	(1,599)	(20)	(2,865)
Cost at December 31, 2015	271,629	439,818	8,186	719,633
Additions	16,465	45,163	128	61,756
Disposals	(862)	(2,431)	(119)	(3,412)

Depreciation	(7,249)	(19,876)	(21)	(27,146)
Net book value of assets disposed	(355)	(108)	(2)	(465)
Disposals	937	3,992	6	4,935
Reclassification and other	(30)	(6)	-	(36)
Impairment losses recognized	(2,824)	(3,970)	(55)	(6,849)
Impairment losses reversed	62	15	3	80
Currency translation differences	507	875	6	1,388
Accumulated depreciation and impairment at December 31, 2015	(121,098)	(277,432)	(1,078)	(399,608)
Depreciation	(7,348)	(20,153)	(68)	(27,569)
Net book value of assets disposed	(117)	(34)	(14)	(165)
Disposals	862	2,431	40	3,333
Reclassification to assets classified as held for sale	2,076	5,578	-	7,654
Reclassification and other	(18)	(4)	-	(22)
Impairment losses recognized	(822)	(2,229)	(2)	(3,053)
Impairment losses reversed	47	60	2	109
Currency translation differences	100	239	1	340
Accumulated depreciation and impairment at December 31, 2016	(126,318)	(291,544)	(1,119)	(418,981)
Net plant in service at December 31, 2015	150,531	162,386	7,108	320,025
Net plant in service at December 31, 2016	158,494	190,656	7,050	356,200

Group's plant in service pledged as security for liabilities at December 31, 2016 and 2015 is CZK 5,636 million and CZK 6,445 million, respectively.

Construction work in progress contains mainly refurbishments performed on Ledvice and Prunéřov and the electricity distribution network of subsidiaries ČEZ Distribuce, a. s. and CEZ Razpredelenie Bulgaria AD. It also contains costs of CZK 2,891 million for the preparation of new nuclear power sources.

As at December 31, 2016 the Group reclassified two wind power plant projects in Poland from line Materials and supplies, net to Construction work in progress, net in the total amount of CZK 514 million based on their state of development and on affirmed intention of construction considering the current conditions of regulation in Poland.

Movements of nuclear fuel in 2016 and 2015 were as follows (in CZK millions):

	2016	2015
Opening balance as of January 1	12,997	10,953
Additions	4,788	5,067
Amortization	(2,939)	(3,087)
Change in capitalized part of provisions	46	64
Closing balance at December 31	14,892	12,997

4. Restricted Financial Assets

Restricted financial assets at December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Restricted debt securities available-for-sale	15,920	14,320
Restricted cash	3,091	3,739
Total restricted financial assets	19,011	18,059

The restricted financial assets contain in particular restricted funds related to accumulated provision for nuclear decommissioning and related to accumulated provision for mine reclamation and mining damages and waste storage reclamation.

5. Investments and Other Financial Assets, Net

Investments and other financial assets, net at December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Financial assets in progress, net	6	-
Term deposits	500	-
Debt securities available-for-sale	4,646	676
Investment in Veolia Energie ČR	2,732	2,732
Investment in MOL	-	9,360
Other equity securities available-for-sale	1,619	887
Derivatives	4,163	7,006
Long-term receivable from settlement with Albania	557	1,111
Other long-term receivables, net	237	826
Total	14,460	22,598

Movements in impairment provisions (in CZK millions):

	2016	2015
	Available-for-sale financial assets	Available-for-sale financial assets
Opening balance	44	53
Derecognition of impaired fin. assets	(43)	(9)
Closing balance	1	44

Debt instruments at December 31, 2016 are contracted to mature in the following periods after the balance sheet date (in CZK millions):

	Long-term receivables	Debt securities available-for-sale
Due in 2018	634	2,800
Due in 2019	36	1,351
Due in 2020	34	396
Due in 2021	13	99
Thereafter	77	-
Total	794	4,646

Debt instruments at December 31, 2015 are contracted to mature in the following periods after the balance sheet date (in CZK millions):

	Long-term receivables	Debt securities available-for-sale
Due in 2017	630	-
Due in 2018	576	676
Due in 2019	15	-
Due in 2020	591	-

Net intangible assets at December 31	2,175	9,626	9,558	21,359	19,610

At December 31, 2016 and 2015, intangible assets presented in the balance sheet include intangible assets in progress of CZK 624 million and CZK 554 million, respectively.

At December 31, 2016 and 2015 goodwill allocated to cash-generating units is as follows (in CZK millions):

	2016	2015
Romanian distribution	1,969	1,976
Romanian sale	554	556
Czech distribution	2,210	2,210
Energotrans	1,675	1,675
Polish power plants (Chorzów, Skawina)	1,202	1,244
ČEZ Teplárenská	727	727
Energetické centrum	261	261
TMK Hydroenergy Power	291	292

Other	424	334
Total	9,558	9,275

7. Impairment of Property, Plant and Equipment and Intangible Assets including Goodwill

The following table summarizes the impairments of property, plant and equipment and intangible assets by cash-generating units in 2016 (in CZK millions):

	Impairment losses			Impairment reversals	Total impairment, net
	Intangible assets other than goodwill	Property, plant and equipment	Total	Property, plant and equipment	
Romanian distribution	-	40	40	(36)	4
Romanian wind power farms	44	2,422	2,466	-	2,466
Tisová power plant (Note 15)	-	299	299	-	299
Bara Group	-	114	114	-	114
ČEZ OZ uzavřený investiční fond	-	151	151	(28)	123
Other	3	150	153	(45)	108
Total	47	3,176	3,223	(109)	3,114

The following table summarizes the impairments of property, plant and equipment and intangible assets by cash-generating units in 2015 (in CZK millions):

	Impairment losses				Impairment reversals	Total impairment, net
	Goodwill	Other intangible assets	Property, plant and equipment	Total	Property, plant and equipment	
Romanian distribution	-	-	27	27	(35)	(8)
Bulgarian distribution	-	46	1,395	1,441	-	1,441
Czech distribution	-	-	16	16	(2)	14
Romanian wind power farms	-	10	2,285	2,295	-	2,295
TEC Varna	-	12	37	49	-	49
Polish power plants (Chorzów, Skawina)	-	-	1,195	1,195	-	1,195
Dětmorovice power plant	-	-	986	986	-	986
Tisová power plant	-	-	605	605	-	605
ČEZ Korporátní služby	-	-	14	14	(37)	(23)
Bara Group	-	-	181	181	-	181
Areál Třeboradice	7	-	120	127	-	127
Other	-	6	833	839	(16)	823
Total	7	74	7,694	7,775	(90)	7,685

In 2016 and 2015 the Group performed impairment tests of goodwill and tests of other non-current assets where there was an indication that the carrying amounts could be impaired. Recognized impairment of property, plant and equipment of cash-generating unit Romanian wind power farms in 2016 was caused mainly by the drop in market prices of electricity. Recognized impairment of cash-generating unit Tisová power plant in 2016 resulted from classification of the net assets as held for sale with regard to expected selling price (Note 15). Recognized impairment of cash-generating unit ČEZ OZ uzavřený investiční fond in 2016 was caused mainly in relation to the decrease in regulated revenues. Recognized impairment of cash-generating unit Bara Group in 2016 was caused mainly by updated terms of regulation and resulting decrease in expected revenues.

Recognized impairment of property, plant and equipment of cash-generating unit Romanian wind power farms in 2015 was caused mainly by the drop in market prices. Recognized impairment of cash-generating unit Bulgarian distribution and sale in 2015 was caused mainly by updated outlook of electricity distribution regulation and subsequent decrease in expected revenues. Recognized impairment of Skawina power plant in 2015 was caused mainly by drop in market prices of electricity, decrease in prices of green and similar certificates and also caused by increase in prices of emission rights. The subsequent impairment test of the cash-generating unit Polish power plants including allocated goodwill did not result in an impairment loss. Recognized impairment of cash-generating unit Dětmarovice power plant in 2015 was caused mainly by drop in market prices of electricity and also by increase in prices of emission rights. Recognized impairment of cash-generating unit Tisová power plant in 2015 resulted from external expert appraisal performed for the sake of the contribution in-kind of the whole power plant to a separate entity. The driver of impairment for Tisová power plant was mainly decrease in market prices of electricity. Recognized impairment of cash-generating unit Bara Group in 2015 was caused mainly by updated outlook of regulation and subsequent decrease in expected revenues.

Description of selected parameters related to testing and determination of recoverable amounts

The impairment test involves determining the recoverable amount of the cash-generating unit, which corresponds to the value in use except for Tisová power plant as at December 31, 2016 when fair value less costs of disposal was used. Value in use is the present value of the future cash flows expected to be derived from a cash-generating unit. Value in use is determined on the basis of an enterprise valuation model and is assessed from a company internal perspective.

Values in use are determined based on the medium-term budget for a period of 5 years and on the anticipated development of the expected cash flows in the long-term, which is valid when the impairment test is performed. These budgets are based on the past experience, as well as on the anticipated future market trends and on the macroeconomic development of the respective region.

The value in use based on complex projection of cash flows of respective companies for the period covering remaining useful life of tested assets was used for determination of the recoverable amounts of the following cash-generating units:

ČEZ, a. s. production assets are tested for any possible impairment as a single cash-generating unit with the exception of specific assets, e.g. the gas fired power plant in Počerady. ČEZ cash-generating unit of production assets is characterized by portfolio management in the deployment and maintenance of various production resources and the cash flows generated from these activities.

As part of testing the recoverable value of fixed assets of the cash generating unit of ČEZ, a. s. (hereinafter the "ČEZ Value"), we performed a sensitivity analysis of the test results to changes in certain key parameters of the used model – changes in wholesale electricity prices (hereinafter the "EE Prices"), changes in the discount rate used in the calculation of the present value of future cash flows and changes in CZK/EUR exchange rate.

The development of commodity prices and, in particular, the development of wholesale electricity prices in Germany (as German electricity prices have a major impact on the development of wholesale electricity prices in the Czech Republic) are the key assumptions used for the ČEZ Value model. The developments of wholesale prices are primarily determined by the EU political decisions, the development of global demand and supply of commodities and the technological progress.

The impact of EE price changes on the results of the ČEZ Value test is further influenced by a number of external factors, including, in particular, changes in the structure and availability of production resources in the Czech Republic and neighboring countries, the macroeconomic development of the Central European region and the regulation of the energy sector in the EU and Germany, including the future Market design and fundamental impact of nuclear sources attenuation in 2020-2021, the impact of the EU approved 2030 climate and energy targets and the impact of the Czech Republic State Energy Concept. The model was constructed for a period adequate to the useful life of the production resources, i.e. for a period that significantly exceeds the period for which commodities, including wholesale electricity price contracts, are traded on public liquid markets. In addition, the electricity market is subject to structural changes and major industry regulation; consequently, complete abandonment of market-based pricing mechanisms and

implementation of alternative, centrally regulated payments for the availability and supply of production resources within the period of useful life of the production resources is actually possible.

With respect to the fact that we are using a long-term model, there are certain internal factors and assumptions that affect the ČEZ Value sensitivity to the development of electricity prices, such as varying deployment of the production portfolio depending on the development of electricity market prices, emission allowances and variable production costs and, in a longer perspective, also the development of fixed costs reflecting the development of the production resources gross margin.

The sensitivity test results reflect expert estimates of the status and development of the above factors in the period of the model and the status of commercial securing of the production portfolio as at December 31, 2016. The borderline values of the interval of all three main tested factors represent test results arising from the use of two price scenarios.

The basic scenario considers long-term EE prices at the level used to prepare ČEZ business plan for 2017-2021. The plan was prepared in the fourth quarter 2016 whereas the plan was based on the active market parameters observed in August and September (electricity prices on EEX energy exchange in Germany, prices on PXE energy exchange in the Czech Republic, price of CO₂ emission rights, FX rate CZK/EUR, interest rates etc.). There is a liquidity for electricity contracts traded on EEX for the period covering the horizon of the business plan and with regard to links between German and Czech electricity transmission network, the EEX prices are basic market price indicator for EE prices in the Czech Republic. For the purposes of the sensitivity analysis, the input EE prices, emission rights prices and foreign exchange rates were applied to the relevant opened positions of ČEZ, a. s. The second basic price scenario assumes EE prices lower by about 30% compared to the basic scenario and also contains decrease of relevant expenses.

A change of the assumed EE prices as per the models by 1%, with other parameters remaining unchanged, would have an impact of approximately CZK 3.1 – 4.0 billion on the ČEZ Value test results. Future cash flows of the model were discounted using a 3.9% rate. A change of 0.1 percentage point in the discount rate, with other parameters remaining unchanged, would change the ČEZ Value by CZK 3.4 – 4.5 billion. A change of 1% in the CZK/EUR exchange rate, with other parameters remaining unchanged, would result in a change of approximately CZK 3.1 – 4.2 billion in the ČEZ Value.

The cash flow projections of Romanian wind power farms are based on approved renewable energy support in the form of granted green certificates and a discount rate of 6.0%. The projection of the cash flows of includes assumption of receiving two green certificates. Receiving of two green certificates is approved by Romanian Energy Regulatory Authority ANRE. The issuance of one of the two green certificates in the expected amount of 4.1 million pieces is postponed until March 2017. The recovery of these deferred green certificates is expected in the period from 2018 to 2020. One of the main factors influencing the value of future cash flows is the price of green certificates. Current value of the green certificate in the model is EUR 29.4 and expected growth rate is 1.0%. Change in the price of green certificate by 1% every year, all other variables held constant, would result in change of value in use by approximately CZK 0.1 billion. Change of the discount rate by 1 percentage point, all other variables held constant, would result in change of value in use by approximately CZK 1.0 billion.

The generation sources in Poland (power plants Chorzów and Skawina) also belong among tested non-current assets where cash flow projects covering remaining useful life were used. Future cash flows were discounted using rate of 5.7%

The value in use derived from the projection of cash flows based on financial budget for a period of 5 years and on the expected future development of cash flows generated from the respective assets was applied when determining the recoverable amount of the following cash-generating units:

The discount rate of 3.3% was used for Czech distribution and sale. Cash flows beyond the five-year period for Czech distribution was based on the terminal value of regulatory asset base.

The discount rate of 3.4% was used for Energotrans and ČEZ Teplárenská. No growth rate is considered for cash flows beyond five-year period for Energotrans and ČEZ Teplárenská.

The discount rate of 3.9% was used for Dětmarovice power plant. No growth rate is considered for cash flows beyond five-year period. The discount rate of 3.4% was used for Energetické centrum. Cash flows beyond the five-year period are extrapolated using 2.0% growth rate.

The discount rate of 6.2% was used for Romanian distribution and sale. Cash flows beyond the five-year period for Romanian distribution were based on the terminal value of regulatory asset base.

The discount rate of 5.5% was used for TMK Hydroenergy Power. There is no growth rate considered for cash flows beyond five-year period.

The discount rate of 5.4% was used for Bulgarian distribution. Cash flows beyond the five-year period do not consider any growth rate. Change of discount rate by 1 percentage point, all other variables held constant, would result in change of value in use by approximately CZK 0.1 billion.

The calculations of value in use for all cash-generating units are most sensitive to the following assumptions:

Gross margins – Gross margins are based on experience from historical trends in the preceding periods, current outlook of market and non-market parameters, eventually with regard to operational efficiency improvements. Gross margins are affected especially by wholesale electricity prices, prices of emission rights and prices of green and similar certificates.

Raw materials price inflation – Estimates are obtained from published indices for the countries from which materials are sourced, as well as data relating to specific commodities. Forecast figures are used if data is available, otherwise past actual raw material price movements have been used as an indicator of future price movements.

Discount rate – Discount rates reflect management's estimate of the risk specific to each unit. The basis used to determine the value assigned is weighted average cost of capital (WACC) of the related subsidiaries.

Estimated growth rate – The basis used to determine the value assigned to estimated growth rate is the anticipated future development of the market, gross domestic product, nominal wages and interest rates and the forecast of regulatory environment, where subsidiaries conduct the business.

8. Changes in the Group Structure

Acquisitions of subsidiaries from third parties in 2016

On January 6, 2016 the Group acquired a 26% interest in ENESA a.s. Total interest of CEZ Group in ENESA is 75 % since this date. ENESA specializes in complex solutions for energy savings in public buildings and industrial plants.

On February 10, 2016 the Group acquired a 100% interest in juwi s.r.o. (now ČEZ Solární, s.r.o.) which constructs photovoltaic power plants.

On June 22, 2016 the Group acquired a 100% interest in Energie2 Prodej, s.r.o. which was a supplier of electricity and gas to all types of companies, organizations, households and public sector in the Czech Republic. The company merged with the succession company ČEZ Prodej, s.r.o. on January 1, 2017.

On September 30, 2016 the Group acquired a 100% interest in AZ KLIMA a.s, which specializes in complex solutions for technical equipment of buildings and making the delivery of ventilation and cooling equipment for buildings.

On December 29, 2016 the Group acquired a 51% interest in newly established company ČEZ LDS, s.r.o. which constructs and operates electricity and gas local distribution grids.

The fair values of acquired identifiable assets and liabilities as of the date of acquisition were as follows (in CZK millions):

	AZ KLIMA	Energie2 Prodej	Other	Total
Share of the Group	100%	100%		
Property, plant and equipment	57	-	18	75
Other non-current assets	31	4	10	45
Materials and supplies, net	50	-	46	96
Receivables, net	240	99	34	373
Cash and cash equivalents	15	16	23	54
Other current assets	35	5	-	40
Long-term debt, net of current portion	(50)	-	(1)	(51)
Other long-term liabilities	(7)	(87)	-	(94)
Short-term loans	(30)	-	-	(30)
Trade and other payables	(163)	(79)	(41)	(283)
Current provisions	(49)	-	-	(49)
Accrued liabilities	(25)	(26)	(4)	(55)
Total net assets	104	(68)	85	121
Share of net assets acquired	104	(68)	68	104
Goodwill	245	87	4	336
Total purchase consideration	349	19	72	440
Less:				
Cash and cash equivalents in the subsidiaries acquired	(15)	(16)	(23)	(54)
Interest acquired in previous periods	-	-	(18)	(18)
Cash outflow on acquisition of the subsidiaries in 2016	334	3	31	368

If the combinations had taken place at the beginning of the year 2016, net income for CEZ Group as of December 31, 2016 would have been CZK 14,640 million and the revenues and other operating income from continuing operations would have been CZK 204,442 million. The amounts of goodwill recognized as

a result of the business combinations comprise the value of expected synergies arising from the acquisitions.

Acquisitions of non-controlling interests from third parties in 2016

On November 22, 2016 the Group increased the ownership interest from 75% to 100% in company EVČ, s.r.o. The following table summarizes the critical terms of this transaction (in CZK millions):

Acquired share of net assets derecognized from non-controlling interests	17
Amount directly recognized in equity	<u>10</u>
Total purchase consideration	<u><u>27</u></u>

Acquisitions of non-controlling interests from third parties in 2015

On April 15, 2015 the Group increased the ownership interest from 75% to 100% in company Eco-Wind Construction S.A. by calling the option to acquire the non-controlling interest.

The following table summarizes the critical terms of this transaction (in CZK millions):

Acquired share of net assets derecognized from non-controlling interests	145
Amount directly recognized in equity	<u>147</u>
Total purchase consideration	<u><u>292</u></u>

9. Investments in Subsidiaries and Joint-ventures

The consolidated financial statements include the financial figures of ČEZ, a. s. and its subsidiaries and joint-ventures listed in the following table:

Subsidiaries	Country of incorporation	% equity interest *		% voting interest	
		2016	2015	2016	2015
A.E. Wind S.A. ¹⁾	Poland	100.00%	100.00%	100.00%	100.00%

10. Cash and Cash Equivalents

The composition of cash and cash equivalents at December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Cash on hand and current accounts with banks	7,685	6,974
Short-term securities	201	1,540
Term deposits	3,340	4,968
Total	11,226	13,482

At December 31, 2016 and 2015, cash and cash equivalents included foreign currency deposits of CZK 3,590 million and CZK 2,647 million, respectively.

The weighted average interest rate on short-term securities and term deposits at December 31, 2016 and 2015 was 0.2% and 0.4%, respectively. For the years 2016 and 2015 the weighted average interest rate was 0.2% and 0.4%, respectively.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise the following at December 31, 2016 and 2015 (in CZK millions):

	2016	2015
Cash and cash equivalents as a separate line in the balance sheet	11,226	13,482
Cash and cash equivalents attributable to assets classified as held for sale (Note 15)	104	-
Total	11,330	13,482

11. Receivables, Net

The composition of receivables, net, at December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Unbilled electricity supplied to retail customers	7,876	1,209
Received advances from retail customers	(6,206)	-
Unbilled supplies to retail customers, net	1,670	1,209
Trade receivables	50,234	44,329
Taxes and fees, excluding income taxes	2,026	2,172
Other receivables	10,090	5,024
Allowance for doubtful receivables	(7,689)	(6,731)
Total	56,331	46,003

The information about receivables from related parties is included in Note 33.

Group's receivables pledged as security for liabilities at December 31, 2016 and 2015 are CZK 344 million and CZK 428 million, respectively.

At December 31, 2016 and 2015, the ageing analysis of receivables, net is as follows (in CZK millions):

	2016	2015
Not past due	52,943	44,565
Past due but not impaired ¹⁾ :		
Less than 3 months	2,530	904
3 – 6 months	287	168
6 – 12 months	196	154
more than 12 months	375	212
Total	<u>56,331</u>	<u>46,003</u>

¹⁾ Past due but not impaired receivables include net receivables, for which the Group recorded an impairment allowance based on the collective assessment of impairment of receivables that are not individually significant.

Movements in allowance for doubtful receivables (in CZK millions):

	2016	2015
Opening balance	6,731	5,997
Additions	2,173	2,009
Reversals	(1,236)	(1,216)
Acquisition of subsidiaries	26	-
Currency translation differences	(5)	(59)
Closing balance	<u>7,689</u>	<u>6,731</u>

12. Emission Rights

The following table summarizes the movements in the quantity (in thousand tons) and book value of emission rights and credits held by the Group during 2016 and 2015 (in CZK millions):

	2016		2015	
	in thousands tons	in millions CZK	in thousands tons	in millions CZK
Emission rights and credits granted and purchased for own use:				
Granted and purchased emission rights and credits at January 1	30,677	2,212	31,567	3,704
Emission rights granted	11,775	-	13,970	-
Settlement of prior year actual emissions with register	(28,667)	(1,954)	(26,328)	(3,707)
Emission rights purchased	15,057	2,079	11,398	2,225
Emission credits purchased	30	-	70	-
Reclassified to assets classified as held for sale	(1,463)	(91)	-	-
Currency translation differences	-	(17)	-	(10)
Granted and purchased emission rights and credits at December 31	<u>27,409</u>	<u>2,229</u>	<u>30,677</u>	<u>2,212</u>
Emission rights and credits held for trading:

Settlement of prior year actual emissions with register	(8)	(2)	(1,813)	(344)
Emission rights purchased	15,921	2,438	9,232	1,969
Emission rights sold	(14,053)	(2,121)	(9,672)	(2,086)
Emission credits purchased	-	-	389	3
Emission credits sold	-	-	(378)	(3)
Fair value adjustment	-	(112)	-	68
Emission rights and credits held for trading at December 31	<u>4,660</u>	<u>827</u>	<u>2,800</u>	<u>624</u>

During 2016 and 2015 total emissions of greenhouse gases made by the Group companies amounted to an equivalent of 30,401 thousand tons and 28,675 thousand tons of CO₂, respectively. At December 31, 2016 and 2015 the Group recognized a provision for CO₂ emissions in total amount of CZK 2,699 million and CZK 2,709 million, respectively (see Notes 2.13 and 20).

At December 31, 2016 and 2015 the item Emission rights in the balance sheet includes also green and similar certificates in total amount CZK 902 million and CZK 620 million, respectively.

The following table shows the impact of transactions with emission rights and credits, green and similar certificates on income for the years ended December 31, 2016 and 2015 (in CZK millions):

	2016	2015
Net gain (loss) from trading with emission rights and credits	(90)	16
Gain on green and similar certificates	1,734	511
Net loss from derivatives	(85)	(56)
Creation of provision for CO ₂ emissions	(2,639)	(2,643)
Settlement of provision for CO ₂ emissions	2,628	4,444
Remitted emission rights and credits	(1,956)	(4,051)
Fair value adjustment	(112)	68
Net loss related to emission rights, emission credits and green and similar certificates	<u>(520)</u>	<u>(1,711)</u>

13. Other Financial Assets, Net

Other financial assets, net, at December 31, 2016 and 2015 were as follows (in CZK millions):

	2016	2015
Debt securities held-to-maturity	2,945	3,852
Debt securities available-for-sale	7	-
Term deposits	2,040	7,315
Equity securities available-for-sale	-	946
Investment in MOL	13,815	-
Equity securities held for trading	-	6
Derivatives	37,694	20,609
Total	<u>56,501</u>	<u>32,728</u>

Derivatives balance comprises mainly the positive fair values of commodity trading contracts. Equity securities available-for-sale balance includes investments in money market fund.

On February 4, 2014 the Group issued EUR 470.2 million exchangeable bonds due 2017 exchangeable for existing ordinary shares of MOL. The deal has been priced on January 28, 2014 with a coupon of 0.00% and initial exchange price has been set at EUR 61.25 per share, reflecting a premium of 35%. Bondholders will have the right to exchange the bonds for shares from January 25, 2017, subject to the issuer's right to elect to deliver an equivalent amount in cash for all or part of the shares. Embedded conversion option was separated and is shown as a separate liability from derivatives in Trade and other payables.

Short-term debt securities held-to-maturity at December 31, 2016 and 2015 have the following effective interest rate structure (in CZK millions):

	2016	2015
Less than 2.00%	2,945	3,852
Total	<u>2,945</u>	<u>3,852</u>

Debt securities available-for-sale at December 31, 2016 and 2015 have the following effective interest rate structure (in CZK millions):

	2016	2015
Less than 2.00%	7	-
Total	<u>7</u>	<u>-</u>

ČEZ, a. s. concluded two put option agreements with Vršanská uhelná a.s. in March 2013. Under these contracts the Company has the right to transfer 100% of the shares of its subsidiary Elektrárna Počerady, a.s. to Vršanská uhelná a.s. First option for the year 2016 was not exercised, second option can be exercised in 2024 for cash consideration of CZK 2 billion. The option agreement can be inactivated until December 31, 2019. The contracts represent derivatives that will be settled by the delivery of unquoted equity instrument. Elektrárna Počerady, a.s. is not quoted on any market. There is significant variability in the range of reasonable fair values for this equity instrument (there is no similar power plant in the Czech Republic for sale and also no similar transaction took place) and thus it is difficult to reasonably assess the probabilities of various estimates. As a result the fair value cannot be reliably measured. Consequently, the put option is measured at cost. There was no option premium paid on the options and therefore the cost of these instruments is zero.

14. Other Current Assets

The composition of other current assets at December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Advances paid	1,969	2,098
Prepayments	1,258	1,297
Total	3,227	3,395

15. Assets and Associated Liabilities Classified as Held for Sale

The agreement between ČEZ and Sokolovská uhelná was concluded on October 20, 2016. The agreement includes a new purchase contract on delivery of brown coal from Sokolovská uhelná and sale of Tisová power plant to Sokolovská uhelná. Both sides agreed to take steps to terminate all the current active lawsuits as well as not to make any further claims.

The Group classified the assets and the liabilities of Tisová power plant as the assets held for sale. As at December 31, 2016 the Group recognized an impairment of these assets held for sale in the amount of CZK 299 million. This expense, representing the difference between the original book value and the sale price, is recognized in the Statement of Income in the row Impairment of Property, Plant and Equipment and Intangible Assets including Goodwill (Note 7). The sale of interest in Elektrárna Tisová took place on January 2, 2017 (Note 37).

The assets classified as held for sale and associated liabilities at December 31, 2016 are as follows (in CZK millions):

	2016		
	Tisová power plant	Other	Total
Property, plant and equipment	194	32	226
Restricted financial assets	13	-	13
Cash and cash equivalents	104	-	104
Receivables, net	152	-	152
Other current assets	152	-	152
Assets classified as held for sale	615	32	647
Non-current provisions	328	-	328
Trade and other payables	24	-	24
Current provisions	129	-	129
Other current liabilities	89	-	89
Liabilities associated with assets classified as held for sale	570	-	570

The assets and results associated with the assets classified as held for sale are reported in the operating segments Generation - Traditional Energy and Generation - New Energy.

16. Equity

As at December 31, 2016 and 2015, the share capital of the Company registered in the Commercial Register totaled CZK 53,798,975,900 and consisted of 537,989,759 shares with a nominal value of CZK 100 per share. All shares are bearer common shares that are fully paid and listed and do not convey any special rights.

Movements of treasury shares in 2016 and 2015 (in pieces):

	2016	2015
Number of treasury shares at beginning of period	3,755,021	3,875,021
Sales of treasury shares	-	(120,000)
Number of treasury shares at end of period	3,755,021	3,755,021

Treasury shares remaining at end of period are presented at cost as a deduction from equity.

Declared dividends per share before tax were CZK 40 in 2016 and CZK 40 in 2015. Dividends from 2016 profit will be declared at the general meeting, which will be held in the first half of 2017.

Capital management

The primary objective of the Group's capital management is to keep its credit rating on the investment grade and on the level that is common in the industry and to maintain healthy capital ratios in order to support its business and maximize value for shareholders. The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions.

The Group primarily monitors capital using the ratio of net debt to EBITDA. Considering the current structure and stability of cash flow and the development strategy, the goal of the Group is the level of this ratio in range 2.5 to 3.0. In addition, the Group also monitors capital using a total debt to total capital ratio. The Group's policy is to keep the total debt to total capital ratio below 50% in the long term.

EBITDA consists of income before income taxes and other income (expenses) plus depreciation and amortization, plus impairment of property, plant and equipment and intangible assets including goodwill and less gain (or loss) on sale of property, plant and equipment. The Group includes within total debt the long-term and short-term interest bearing loans and borrowings. Net debt is defined as total debt less cash and cash equivalents and highly liquid financial assets. Highly liquid financial assets consist for capital management purposes of short-term equity and debt securities available-for-sale, short-term debt securities held-to-maturity, long-term debt securities available-for-sale and both short-term and long-term deposits. Total capital is total equity attributable to equity holders of the parent plus total debt.

The calculation and evaluation of the ratios is done using consolidated figures (in CZK millions):

	2016	2015
Total long-term debt	159,473	157,271
Total short-term loans	8,343	223
Total debt	167,816	157,494
Less:		
Cash and cash equivalents	(11,226)	(13,482)
Highly liquid financial assets:		
Short-term equity securities available-for-sale (Note 13)	-	(946)
Short-term debt securities available-for-sale (Note 13)	(7)	-
Short-term debt securities held-to-maturity (Note 13)	(2,945)	(3,852)
Short-term deposits (Note 13)	(2,040)	(7,315)
Long-term deposits (Note 5)	(500)	-
Long-term debt securities available-for-sale (Note 5)	(4,646)	(676)
Total net debt	146,452	131,223
Income before income taxes and other income (expenses)	26,114	28,961
Depreciation and amortization	28,978	28,619
Impairment of property, plant and equipment and intangible assets including goodwill	3,114	7,685
Gains and losses on sale of property, plant and equipment (Note 25 and 28)	(124)	(161)
EBITDA	58,082	65,104
Total equity attributable to equity holders of the parent	256,812	267,893
Total debt	167,816	157,494
Total capital	424,628	425,387
Net debt to EBITDA ratio	2.52	2.02
Total debt to total capital ratio	39.5%	37.0%

17. Long-term Debt

Long-term debt at December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
3.005% Eurobonds, due 2038 (JPY 12,000 million)	2,621	2,466
2.845% Eurobonds, due 2039 (JPY 8,000 million)	1,748	1,645

4.270% registered bonds, due 2047 (EUR 61 million)	1,622	1,621
3.550% registered bonds, due 2038 (EUR 30 million)	807	807
Exchangeable bonds, due 2017 (EUR 470.2 million) ²⁾	12,598	12,420
Total bonds and debentures	132,044	134,701
Less: Current portion	(13,805)	(9,176)
Bonds and debentures, net of current portion	118,239	125,525
Long-term bank and other loans:		
Less than 2.00% p. a.	18,881	18,040
2.00% to 2.99% p. a.	8,545	4,530
5.00% to 5.99% p. a.	2	-
8.00% to 8.99% p. a.	1	-
Total long-term bank and other loans	27,429	22,570
Less: Current portion	(3,403)	(2,520)
Long-term bank and other loans, net of current portion	24,026	20,050
Total long-term debt	159,473	157,271
Less: Current portion	(17,208)	(11,696)
Total long-term debt, net of current portion	142,265	145,575

¹⁾ The interest rate is based on inflation realized in Eurozone Countries (Harmonized Index of Consumer Prices – HICP) and is fixed through the closed swap to the rate 4.553% p. a.

²⁾ Bonds are exchangeable for ordinary shares of MOL Hungarian Oil and Gas PLC (see Note 13). The bonds carry no interest and the separation of embedded conversion option resulted in effective interest rate of 1.43% p. a.

The interest rates indicated above are historical rates for fixed rate debt and current market rates for floating rate debt. The actual interest payments are affected by interest rate risk hedging carried out by the Group.

All long-term debt is recognized in original currencies while the related hedging derivatives are recognized using the method described in Note 2.20.

The future maturities of long-term debt are as follows (in CZK millions):

	2016	2015
Current portion	17,208	11,696
Between 1 and 2 years	8,746	16,503
Between 2 and 3 years	4,676	2,840
Between 3 and 4 years	23,439	4,186
Between 4 and 5 years	27,225	22,926
Thereafter	78,179	99,120
Total long-term debt	<u>159,473</u>	<u>157,271</u>

The following table analyses the long-term debt by currency (in millions):

	2016		2015	
	Foreign currency	CZK	Foreign currency	CZK
EUR	4,761	128,784	4,827	130,457
USD	584	14,966	583	14,479
JPY	31,443	6,888	31,440	6,483
BGN	42	582	24	330
PLN	587	3,595	662	4,199
RON	560	3,331	-	-
CZK	-	1,327	-	1,323
Total long-term debt		<u>159,473</u>		<u>157,271</u>

Long-term debt with floating interest rates exposes the Group to interest rate risk. The following table summarizes long-term debt with floating rates of interest by contractual reprising dates at December 31, 2016 and 2015 without considering interest rate hedging (in CZK millions):

	2016	2015
Floating rate long-term debt		
with interest rate fixed from 1 to 3 months	13,592	5,472
with interest rate fixed from 3 months to 1 year	17,346	19,147
with interest rate fixed more than 1 year	582	330
Total floating rate long-term debt	<u>31,520</u>	<u>24,949</u>
Fixed rate long-term debt	<u>127,953</u>	<u>132,322</u>
Total long-term debt	<u>159,473</u>	<u>157,271</u>

Fixed rate long-term debt exposes the Group to the risk of changes in fair values of these financial instruments. For related fair value information and risk management policies of all financial instruments see Note 18 and Note 19.

18. Fair Value of Financial Instruments

Fair value is defined as the amount at which the instrument could be exchanged in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced or liquidation sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, current investments

The carrying amount of cash and other current financial assets approximates fair value due to the relatively short-term maturity of these financial instruments.

Securities held for trading

The fair values of equity and debt securities that are held for trading are estimated based on quoted market prices.

Investments

The fair values of instruments, which are publicly traded on active markets, are determined based on quoted market prices. For unquoted equity instruments the Group considered the use of valuation models and concluded that the range of reasonable fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed. Therefore unquoted equity instruments are carried at cost and the fair value information is not disclosed.

Short-term receivables and payables

The carrying amount of receivables and payables approximates fair value due to the short-term maturity of these financial instruments.

Short-term loans

The carrying amount approximates fair value because of the short period to maturity of those instruments.

Long-term debt

The fair value of long-term debt is based on the quoted market price for the same or similar issues or on the current rates available for debt with the same maturity profile. The carrying amount of long-term debt and other payables with variable interest rates approximates their fair values.

Derivatives

The fair value of derivatives is based upon mark to market valuations.

Carrying amounts and the estimated fair values of financial instruments at December 31, 2016 and 2015 are as follows (in CZK millions):

		2016		2015	
	Cate- gory	Carrying amount	Fair value	Carrying amount	Fair value

18.1. Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

There were no transfers between the levels in 2016 and 2015.

As at December 31, 2016, the fair value hierarchy was the following (in CZK millions):

Assets measured at fair value

	Total	Level 1	Level 2	Level 3
Commodity derivatives	37,816	433	37,383	-
Cash flow hedges	2,689	447	2,242	-
Other derivatives	1,352	131	1,221	-
Restricted debt securities available-for-sale	15,920	15,920	-	-
Debt securities available-for-sale	4,653	4,653	-	-
Equity securities available-for-sale *	14,947	14,947	-	-

Liabilities measured at fair value

	Total	Level 1	Level 2	Level 3
Commodity derivatives	(36,924)	(2,133)	(34,791)	-
Cash flow hedges	(4,740)	(983)	(3,757)	-
Other derivatives	(2,508)	(10)	(2,498)	-

Assets and liabilities for which fair values are disclosed

	Total	Level 1	Level 2	Level 3
Debt securities held-to-maturity	2,945	-	2,945	-
Term deposits	2,540	-	2,540	-
Long-term debt	(180,430)	(118,956)	(61,474)	-

As at December 31, 2015, the fair value hierarchy was the following (in CZK millions):

Assets measured at fair value

	Total	Level 1	Level 2	Level 3
Commodity derivatives	19,178	514	18,664	-
Cash flow hedges	6,791	2,259	4,532	-
Other derivatives	1,645	35	1,610	-
Equity securities held for trading	6	6	-	-
Restricted debt securities available-for-sale	14,320	14,320	-	-
Debt securities available-for-sale	676	676	-	-
Equity securities available-for-sale *	12,979	12,979	-	-

Liabilities measured at fair value

	Total	Level 1	Level 2	Level 3
Commodity derivatives	(15,823)	(1,793)	(14,030)	-
Cash flow hedges	(737)	(2)	(735)	-
Other derivatives	(2,269)	(507)	(1,762)	-

Assets and liabilities for which fair values are disclosed

	Total	Level 1	Level 2	Level 3
Debt securities held-to-maturity	3,852	-	3,852	-
Term deposits	7,315	-	7,315	-
Long-term debt	(175,831)	(126,220)	(49,611)	-

* Some of the equity securities available-for-sale are carried at cost as the fair value cannot be reliably measured.

The Group enters into derivative financial instruments with various counterparties, principally large power and utility groups and financial institutions with high credit ratings. Derivatives valued using valuation techniques with market observable inputs are mainly commodity forward and futures contracts, foreign exchange forward contracts, interest rate swaps and options. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations and option pricing models (e.g. Black-Scholes). The models incorporate various inputs including the forward rate curves of the underlying commodity, foreign exchange spot and forward rates and interest rate curves.

18.2. Offsetting of Financial Instruments

The following table shows the recognized financial instruments that are offset, or subject to enforceable master netting agreement or other similar agreements but not offset, as of December 31, 2016 and 2015 (in CZK millions):

	2016		2015	
	Financial assets	Financial liabilities	Financial assets	Financial liabilities
Derivatives	41,857	(44,172)	27,615	(18,829)
Other financial instruments *	28,617	(23,827)	23,610	(24,758)
Collaterals paid (received) **	1,341	(1,222)	1,309	(536)
Gross financial assets / liabilities	71,815	(69,221)	52,534	(44,123)
Assets / liabilities set off under IAS 32	-	-	-	-
Amounts presented in the balance sheet	71,815	(69,221)	52,534	(44,123)
Effect of master netting agreements	(68,965)	68,965	(33,402)	33,402
Net amount after master netting agreements	2,850	(256)	19,132	(10,721)

* Other financial instruments consist of invoices due from derivative trading and are included in Receivables, net or Trade and other payables.

** Collaterals paid are included in Receivables, net and collaterals received are included in Trade and other payables.

When trading with derivative instruments, ČEZ enters into the EFET and ISDA framework contracts. These contracts generally allow mutual offset of receivables and payables upon the premature termination of agreement. The reason for premature termination is insolvency or non-fulfillment of agreed terms by the counterparty. The right to mutual offset is either embedded in the framework contract or results from the security provided. There is CSA (Credit Support Annex) concluded with some counterparties defining the permitted limit of exposure. When the limit is exceeded, there is a transfer of cash reducing exposure below an agreed level. Cash security (collateral) is also included in the final offset.

The information about offset of unbilled electricity supplied to retail customers with advances received is included in Note 11 and 23.

Short-term derivative assets are included in the balance sheet in Other financial assets, net, long-term derivative assets in Investments and other financial assets, net, long-term derivative liabilities in Other long-term liabilities and short-term derivative liabilities in Trade and other payables.

19. Financial Risk Management

Risk management approach

A risk management system is being successfully developed in order to protect the Group's value while taking the level of risk acceptable for the shareholders. In the Group, the risk is defined as a potential difference between the actual and the expected (planned) developments and is measured by means of the extent of such difference in CZK and the likelihood with which such a difference may occur.

A risk capital concept is applied within the Group. The concept allows the setting of basic cap for partial risk limits and, in particular, the unified quantification of all kinds of risks. The value of aggregate annual risk limit (Profit@Risk) is approved by the Board of Directors based on the Risk Management Committee proposal for every financial year. The proposed limit value is derived from historical volatility of profit, revenues and costs of the Group (the top-down method). The approved value in CZK is set on the basis of a 95% confidence level and expresses a maximum profit decrease, which is the Group willing to take in order to reach the planned annual profit.

The bottom-up method is used for setting and updating the Risk frames. The Risk frames include the definition of risk and departments/units of the Group for which the frame is obligatory; definition of rules and responsibilities for risk management; permitted instruments and methods of risk management and actual risk limits, including a limit which expresses the share in the annual Profit@Risk limit.

The main Business Plan market risks are quantified in the Group (EBITDA@Risk based on MonteCarlo simulation in Y+1 to Y+5 horizon). The market risks are actively managed through gradual electricity sales and emission allowances' purchases in the following 6-year horizon, closing long-term contracts for electricity sale and emission allowances purchase and the FX and IR risk hedging in medium-term horizon. In Business Plan horizon, the risk management is also based on Debt Capacity concept which enables to assess the impact of main Investment and other Activities (incl. the risk characteristics), on expected cash flow and total debt in order to maintain corporate rating. Risks of Investment Projects are also managed and monitored based on unified quantification of all kinds of risk according to Group methodology.

Risk management organization

The supreme authority responsible for risk management in ČEZ, a. s. is the CFO, except for approval of the aggregate annual budget risk limit (Profit@Risk) within the competence of the ČEZ, a. s. Board of Directors. CFO decides, based on the recommendation of the Risk Management Committee, on the development of a system of risk management, on an overall allocation of risk capital to the individual risks and organizational units, he approves obligatory rules, responsibilities and limit structure for the management of partial risks.

The Risk Management Committee (advisory committee of CFO) continuously monitors an overall risk impact on the Group, including Group risk limits utilization, status of risks linked to Business Plan horizon, hedging strategies status, assessment of impact of Investment and other Activities on potential Group debt capacity and cash flow in order to maintain corporate rating.

Overview and methods of risk management

The Group applies a unified categorization of the Group's risks which reflects the specifics of a corporate, i.e. non-banking company, and focuses on primary causes of unexpected development. The risks are divided into four basic categories listed below.

1. Market risks	2. Credit risks	3. Operation risks	4. Business risks
1.1 Financial (FX, IR)	2.1 Counterparty default	3.1 Operating	4.1 Strategic
1.2 Commodity	2.2 Supplier default	3.2 Internal change	4.2 Political
1.3 Volumetric	2.3 Settlement	3.3 Liquidity management	4.3 Regulatory
1.4 Market liquidity		3.4 Security	4.4 Reputation

From the view of risk management, the Group activities can be divided into two basic groups:

- Activities with the unified quantification of the share of respective activity in the aggregate risk limit of the Group (i.e. using specific likelihood, it is possible to objectively determine what risk is associated with an activity/planned profit). These risks are managed by the rules and limits set by the CFO of ČEZ,

- a. s. based on the recommendation of the Risk Management Committee and, concurrently, in accordance with governing documents of the respective units/processes of the Group.
- Activities whose share in the aggregate risk limit of the Group has not been quantified so far or for objective reasons. These risks are managed by the responsible owners of the relevant processes in accordance with internal governing documents of the respective units/processes of the Group.

For all risks quantified on a unified basis, a partial risk limit is set whose continuous utilization is evaluated at least once a month and is usually defined as a sum of the actually expected deviation of expected annual profit from the plan and the potential risk of loss on a 95% confidence. The Group's methodologies and data provide for a unified quantification of the following risks:

- Market risks: financial (currency, interest and stock price) risks, commodity prices (electricity, emission allowances, coal, gas, crude oil), volume (volume of electricity produced by wind power plants)
- Credit risks: financial and business counterparty risk and electricity, gas and heat end customer risk
- Operational risks: risks of nuclear and fossil power plants operation in the Czech Republic, investment risks.

The development of the Group's quantified risks is reported to the Risk Management Committee every month through 3 regular reports:

- Annual budget risks (annual Profit@Risk limit utilization)
- Business plan risks (EBITDA@Risk based on MonteCarlo simulation)
- Debt capacity (actual deviation from the optimal debt within Y+5 horizon, derived from rating agency requirements on debt indicators in order to preserve the ČEZ rating).

19.1. Qualitative description of risks associated with financial instruments

Commodity risks

The development of electricity, emission allowances, coal and gas prices is a key risk factor of the Group's value. The current system of commodity risk management is focused on (i) the margin from the own electricity production sales, i.e. from trades resulting in optimizing the sales of the Group's production and in optimizing the emission allowances position for production (the potential risk is managed on the EaR, VaR and the EBITDA@Risk bases), and (ii) the margin from the proprietary trading of commodities within the whole Group (the potential risk is managed on the VaR basis).

Market financial risks (currency, interest and stock price risks)

The development of foreign exchange rates, interest rates and stock prices is a significant risk factor of the Group's value. The current system of financial risk management is focused mainly on (i) the future cash flows and (ii) financial trades which are realized for the purposes of an overall risk position management in accordance with the risk limits (the potential risk is managed on the basis of VaR, EBITDA@Risk and complementary position limits). Own financial instruments (i.e. active and passive financial trades and derivative trades) are realized entirely in the context of an overall expected cash flows of the Group (including operational and investment foreign currency flows).

Credit risks

With respect to the Group's activities managed on a centralized level, credit exposures of individual financial partners and wholesale partners are managed in accordance with individual credit limits. The individual limits are set and continuously updated according to the counterparty's credibility (in accordance with international rating and internal financial evaluation of counterparties with no international rating).

With respect to the electricity sales to end customers in the Czech Republic, the actual credibility is monitored for each business partner based on payment history (in addition, the financial standing is considered for selected partners). This credibility determines the payment conditions of partners (i.e. it indirectly determines an amount of an approved credit exposure) and also serves to quantify both the expected and the potential losses.

The Group's maximum exposure to credit risk to receivables and other financial instruments as at December 31, 2016 and 2015 is the carrying value of each class of financial assets except for financial guarantees. Credit risk from balances with banks and financial institutions is managed by the Group's risk management department in cooperation with Group's treasury department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty.

In accordance with the credit risk methodology applied to the banking sector per Basel II, every month the expected and potential losses are quantified on a 95% confidence level. It means that the share of all credit risks mentioned above in the aggregate annual Profit@Risk limit is quantified and evaluated.

Liquidity risks

The Group's liquidity risk is primarily perceived as an operational risk (risk of liquidity management) and a risk factor is the internal ability to effectively manage the future cash flows planning process in the Group and to secure the adequate liquidity and effective short-term financing (the risk is managed on a qualitative basis). The fundamental liquidity risk management (i.e. liquidity risk within the meaning for banking purposes) is covered by the risk management system as a whole. In any given period, the future deviations of the Group's expected cash flows are managed in accordance with the aggregate risk limit and in the context of the actual and the targeted debt/equity ratio of the Group.

19.2. Quantitative description of risks associated with financial instruments

Commodity risks

The required quantitative information on risks (i.e. a potential change of market value resulting from the effects of risk factors as at December 31) was prepared based on the assumptions given below:

- the indicator of risk associated with financial instruments is defined as the monthly parametric VaR (95% confidence) which expresses a maximum potential decrease in fair value of contracts classified as derivatives under IAS 39 (the underlying commodities in the Group's derivative transactions are: electricity, EUA and CER/ERU emission allowances, gas, coal ARA, Richards Bay, Newcastle and crude oil and crude oil products) on the given confidence level
- highly probable forecasted future electricity generation sales with the delivery in the CZ power grid are included in the VAR calculation to reflect the hedging character of significant portion of the existing derivative sales of electricity with delivery in Germany
- for the calculation of volatility and correlations (between commodity prices), the SMA (Simple Moving Average) method is applied to 60 daily time series
- the source of market data is mainly EEX, PXE and ICE
- the indicator VaR illustrates mainly the impact of revaluation of above mentioned financial instruments to statement of income.

Potential impact of the above risk factors as at December 31 (in CZK millions):

	2016	2015
Monthly VaR (95%) – impact of changes in commodity prices	962	616

Currency risks

The required quantitative information on risks (i.e. a potential change of market value resulting from the effects of currency risk as at December 31) was prepared based on the assumptions given below:

- the indicator of currency risk is defined as the monthly VaR (95% confidence)
- for the calculation of VaR, based on volatility and internal correlations of each considered currency, the method of historical simulation VaR is applied to 90 daily historical time series
- the relevant currency position is defined mainly as a discounted value of foreign currency cash flows from all contracted financial instruments, from expected foreign currency operational revenues and costs in 2017 and from highly probable forecasted foreign currency revenues, costs or capital expenditures that are being hedged by financial instruments
- the relevant currency positions reflect all significant foreign-currency flows of the Group companies in the monitored basket of foreign currencies
- the source of market FX and interest rate data is mainly IS Reuters and IS Bloomberg
- the indicator VaR illustrates mainly the impact of revaluation of above mentioned currency position to statement of income.

Potential impact of the currency risk as at December 31 (in CZK millions):

	2016	2015
Monthly currency VaR (95% confidence)	599	848

Interest risks

For the quantification of the potential impact of the interest risk was chosen the sensitivity of the interest revenue and cost to the parallel shift of yield curves. The approximate quantification (as at December 31) was based on the following assumptions:

- parallel shift of the yield curves (+10bp) was selected as the indicator of interest risk
- the statement of income sensitivity is measured as an annual change of the interest revenue and cost resulting from the interest-sensitive positions as at December 31
- the considered interest positions reflect all significant interest-sensitive positions of the Group companies
- the source of market interest rates is mainly IS Reuters and IS Bloomberg.

Potential impact of the interest risk as at December 31 (in CZK millions):

	2016	2015
IR sensitivity* to parallel yield curve shift (+10bp)	(18)	(9)

* Negative result denotes higher increase in interest costs than in interest revenues

Stock price risks

The required quantitative information on risks (i.e. a potential change of financial instruments market value resulting from the effects of stock price risk as at December 31) was based on the assumptions given below:

- monthly VaR (95% confidence) was selected as the indicator of stock price risk
- the relevant stock position is defined as market value of stocks/stock options as at December 31
- the considered stock positions reflect all significant stock-sensitive deals of the CEZ Group companies
- the relevant volatility and standard deviation is determined from risk module IS Bloomberg
- the source of market data is IS Bloomberg and ČNB data
- the indicator VaR illustrates mainly impact of revaluation of above mentioned stock position, classified as equity securities available-for-sale, to statement of comprehensive income.

Potential impact of the stock price risk as at December 31 (in CZK millions):

	2016	2015
Monthly stock VaR (95% confidence)	1,326	985

Credit exposure

Credit exposure from provided guarantees at December 31 (in CZK millions):

	2016	2015
Guarantees provided to joint-ventures *	3,212	2,998

* Some of the guarantees could be called until June 2026 at the latest.

The guarantees provided relate to bank loans. The beneficiary may claim the guarantee only upon failure to comply with certain conditions of loans. The companies whose liabilities are the subject to the guarantees currently comply with their obligations.

Liquidity risk

Contractual maturity profile of financial liabilities at December 31, 2016 (in CZK millions):

	Loans	Bonds and debentures	Trade payables and other liabilities	Derivatives *	Guarantees issued **
Due in 2017	11,941	18,788	42,189	242,087	3,212
Due in 2018	3,647	10,352	9	32,828	-
Due in 2019	3,474	6,314	1,251	12,371	-
Due in 2020	3,399	25,114	-	6,298	-
Due in 2021	3,063	28,298	-	9,880	-
Thereafter	11,168	94,038	-	45,963	-
Total	36,692	182,904	43,449	349,427	3,212

Contractual maturity profile of financial liabilities at December 31, 2015 (in CZK millions):

	Loans	Bonds and debentures	Trade payables and other liabilities	Derivatives *	Guarantees issued **
Due in 2016	2,882	14,446	41,291	260,322	2,998
Due in 2017	3,004	18,550	159	27,968	-
Due in 2018	2,949	4,934	2	8,457	-
Due in 2019	2,939	6,284	1,751	3,679	-
Due in 2020	2,871	25,056	-	5,998	-
Thereafter	8,848	120,959	-	55,754	-
Total	23,493	190,229	43,203	362,178	2,998

* Contractual maturities for derivatives represent contractual cash out-flows of these instruments, but at the same time the Group will receive corresponding consideration. For fair values of derivatives see Note 18.

** Maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

The committed credit facilities available to the Group as at December 31, 2016 and 2015 amounted to CZK 21.7 billion and CZK 30.5 billion, respectively.

19.3. Hedge accounting

The Group enters into cash flow hedges of future highly probable cash inflows from the sales denominated in EUR against the currency risk. The hedged cash flows are expected to occur in the period from 2017 to 2021. The hedging instruments as at December 31, 2016 and 2015 are the EUR denominated liabilities from the issued Eurobonds and bank loans in the total amount of EUR 3.9 billion and EUR 2.9 billion, respectively, and currency forward contracts and swaps. The fair value of these derivative hedging instruments (currency forward contracts and swaps) amounted to CZK 1,537 million and CZK 1,245 million at December 31, 2016 and 2015, respectively.

The Group also enters into cash flow hedges of highly probable future sales of electricity in the Czech Republic from 2018 to 2022. The hedging instruments are the futures and forward contracts electricity sales in Germany. The fair value of these derivative hedging instruments amounted to CZK (3,588) million and CZK 4,263 million at December 31, 2016 and 2015, respectively.

The Group applied cash flow hedges of future highly probable purchases of emission allowances which had been expected to occur in 2016. The hedging instruments as at December 31, 2015 were the futures contracts for the purchase of allowances equivalent to 7.3 million tons of CO₂ emissions. The fair value of these derivative hedging instruments amounted to CZK 546 million at December 31, 2015. The final settlement of the purchase of these hedged emission allowances was in 2016.

In 2016 and 2015 the amounts removed from equity in respect of cash flow hedges were recognized in profit or loss and included in the lines Sales of electricity and related services, Gains and losses from commodity derivative trading, net, Emission rights, net, Other financial expenses and Other financial income. In 2016 and 2015 the Group recognized in profit or loss the ineffectiveness that arises from cash flow hedges in the amount of CZK (29) million and CZK (791) million, respectively. The ineffectiveness in 2016 and 2015 was mainly caused by the fact that the hedged cash flows are no more highly probable to occur.

20. Provisions

Provisions at December 31, 2016 and 2015 are as follows (in CZK millions):

	2016			2015		
	Non-current	Current	Total	Non-current	Current	Total
Nuclear provisions	53,585	1,918	55,503	48,083	2,038	50,121
Provision for reclamation of mines and mining damages	7,362	271	7,633	7,289	274	7,563
Provision for waste storage reclamation	974	98	1,072	1,501	99	1,600
Provision for CO ₂ emissions (see Note 12)	-	2,699	2,699	-	2,709	2,709
Other provisions	4,439	3,174	7,613	3,652	3,099	6,751
Total	66,360	8,160	74,520	60,525	8,219	68,744

20.1. Nuclear Provisions

The Company operates two nuclear power plants. Nuclear power plant Dukovany consists of four units which were put into service from 1985 to 1987. Nuclear power plant Temelín has two units which have started commercial operation in 2002 and 2003. The Czech parliament has enacted a Nuclear Act ("Act") which defines certain obligations for the decontamination and dismantling ("decommissioning") of nuclear facilities and the disposal of radioactive waste and spent fuel ("disposal"). The Act requires that all nuclear parts of plant and equipment be decommissioned following the end of the plant's operating life. For the purpose of accounting for the nuclear provisions, it is assumed that the end of the plant's operating life will be 2035 for Dukovany and 2042 for Temelín. A 2013 Dukovany and a 2014 Temelín decommissioning cost study estimate that nuclear decommissioning will cost CZK 22.4 billion and CZK 18.4 billion, respectively. The Company makes contributions to a restricted bank account in the amount of the nuclear provisions

recorded under the Act. These restricted funds can be invested in government bonds and term deposits in accordance with the legislation and are shown in the balance sheet as part of Restricted financial assets (see Note 4).

Pursuant to the Act, the Ministry of Industry and Trade established the Radioactive Waste Repository Authority ("RAWRA") as the central organizer and operator of facilities for the final disposal of radioactive waste and spent fuel. The RAWRA operates, supervises and is responsible for disposal facilities and for disposal of radioactive waste and spent fuel therein. The activities of the RAWRA are financed through a nuclear account funded by the originators of radioactive waste. Contribution to the nuclear account is stated by legislation at 50 CZK per MWh produced at nuclear power plants till 2016 and at 55 CZK per MWh produced at nuclear power plants since 2017. In 2016 and 2015, the payments to the nuclear account amounted to CZK 1,205 million and CZK 1,342 million, respectively. The originator of radioactive waste and spent fuel directly covers all costs associated with interim storage of radioactive waste and spent fuel.

The Group has established provisions as described in Note 2.24, to recognize its estimated liabilities for decommissioning and spent fuel storage. The following is a summary of the provisions for the years ended December 31, 2016 and 2015 (in CZK millions):

		Accumulated provisions		
	Nuclear Decommis- sioning	Spent fuel storage		
		Interim	Long-term	Total
Balance at December 31, 2014	16,808	7,365	23,129	47,302
Movements during 2015:				
Discount accretion and effect of inflation	504	221	694	1,419
Provision charged to income statement	-	544	-	544
Effect of change in estimate charged to income statement	-	22	-	22
Effect of change in estimate added to fixed assets (Note 2.24)	2,186	64	642	2,892
Current cash expenditures	-	(716)	(1,342)	(2,058)
Balance at December 31, 2015	19,498	7,500	23,123	50,121
Movements during 2016:				
Discount accretion and effect of inflation	487	188	578	1,253
Provision charged to income statement	-	421	-	421
Effect of change in estimate credited to income statement	-	(72)	-	(72)
Effect of change in estimate added to (deducted from) fixed assets (Note 2.24)	(1,093)	46	6,748	5,701
Current cash expenditures	-	(716)	(1,205)	(1,921)
Balance at December 31, 2016	18,892	7,367	29,244	55,503

The current cash expenditures for the long-term storage of spent nuclear fuel represent payments to the state controlled nuclear account and the expenditures for interim storage represent mainly the purchase of interim fuel storage containers and other related equipment.

In 2016, the Group recorded a change in estimate for interim storage of spent nuclear fuel in connection with the change of anticipated future storage costs, in estimate for the nuclear decommissioning in connection with the change of timing of the costs for decommissioning expenditure in Dukovany Nuclear Power Plant and in estimate for permanent storage of spent nuclear fuel because of the change in expected production in nuclear power plants and in the amount of the contribution paid to the state nuclear account from the year 2017 on.

In 2015 the Group recorded the change in estimate for interim spent fuel storage in connection with the change in expectations of future storage costs and change in discount rate, the change in estimate in provision for nuclear decommissioning in connection with the change in discount rate and the change in

long-term spent fuel storage in connection with the modification of the expected output of the nuclear power plants and change in discount rate.

The actual decommissioning and spent fuel storage costs could vary substantially from the above estimates because of new regulatory requirements, changes in technology, increased costs of labor, materials, and equipment and/or the actual time required to complete all decommissioning, disposal and storage activities.

20.2. Provision for Mine Reclamation and Mining Damages and Waste Storage Reclamation

The following table shows the movements of provisions for the years ended December 31, 2016 and 2015 (in CZK millions):

	Mine reclamation and damages	Waste storage
Balance at December 31, 2014	6,749	1,574
Movements during 2015:		
Discount accretion and effect of inflation	194	47
Provision charged to income statement	55	-
Effect of change in estimate added to fixed assets (Note 2.25)	860	35
Current cash expenditures	(295)	(47)
Reversal of provision	-	(9)
Balance at December 31, 2015	7,563	1,600
Movements during 2016:		
Discount accretion and effect of inflation	182	31
Provision charged to income statement	72	22
Effect of change in estimate added to (deducted from) fixed assets (Note 2.25)	78	(149)
Reclassification to liabilities associated with assets classified as held for sale	-	(323)
Current cash expenditures	(262)	(70)
Reversal of provision	-	(39)
Balance at December 31, 2016	7,633	1,072

The provision for decommissioning and reclamation of mines and mining damages was recorded by Severočeské doly a.s., a mining subsidiary of ČEZ. Severočeské doly a.s. operates open pit coal mines and is responsible for decommissioning and reclamation of the mines as well as for damages caused by the operations of the mines. These provisions have been calculated using the best estimates of the expenditures required to settle the present obligation at the balance sheet date. Current cash expenditures represent cash payments for current reclamation of mining area and settlement of mining damages. Change in estimate represents change in provision as result of updated cost estimates in the current period, mainly due to changes in expected prices of reclamation activities.

21. Other Long-term Liabilities

Other long-term liabilities at December 31, 2016 and 2015 are as follows (in CZK millions):

	2016	2015
Deferred connection fees	3,924	4,601
Derivatives	5,768	1,956
Other	1,511	2,122
Total	11,203	8,679

22. Short-term Loans

Short-term loans at December 31, 2016 and 2015 are as follows (in CZK millions):

	2016	2015
Short-term bank loans	7,962	40
Bank overdrafts	381	183
Total	8,343	223

Interest on short-term loans is variable. The weighted average interest rate was 0.2% and 0.7% at December 31, 2016 and 2015, respectively. For the years 2016 and 2015 the weighted average interest rate was 0.4% and 1.7%, respectively.

23. Trade and Other Payables

Trade and other payables at December 31, 2016 and 2015 are as follows (in CZK millions):

	2016	2015
Advances received from retail customers	12,160	18,710
Unbilled electricity supplied to retail customers	(11,022)	(15,532)
Received advances from retail customers, net	1,138	3,178
Trade payables	36,941	32,329
Fair value of option (see Note 13)	1,228	182
Derivatives	37,176	16,691
Other	4,033	5,630
Total	80,516	58,010

The information about payables to related parties is included in Note 33.

24. Accrued Liabilities

Accrued liabilities at December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Accrued interest	2,203	2,328
Taxes and fees, except income tax	2,039	2,258
Unbilled goods and services	9,627	8,807
Deferred income	251	425
Other	131	127
Total	14,251	13,945

25. Revenues and Other Operating Income

The composition of revenues and other operating income for the years ended December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Sales of electricity and related services:		
Sales of electricity to end customers	50,159	54,742
Sales of electricity through energy exchange	4,766	4,920
Sales of electricity to traders	37,138	35,672
Sales to distribution and transmission companies	324	344
Other sales of electricity	15,653	16,211
Effect of hedging - presales of electricity (Note 19.3)	2,989	4,055
Effect of hedging - currency risk hedging (Note 19.3)	(1,957)	(3,297)
Sales of ancillary, system, distribution and other services	65,872	69,458
Total sales of electricity and related services	174,944	182,105
Sales of gas, coal, heat and other revenues:		
Sales of gas	9,214	8,294
Sales of coal	4,518	4,331
Sales of heat	6,877	6,443
Other	6,456	5,501
Total sales of gas, coal, heat and other revenues	27,065	24,569
Other operating income:		
Contractual fines and interest fees for delays	442	735
Gain on sale of property, plant and equipment	148	184
Gain on sale of material	87	147
Other	1,058	2,427
Total other operating income	1,735	3,493
Total revenues and other operating income	203,744	210,167

26. Gains and Losses from Commodity Derivative Trading, Net

The composition of gains and losses from commodity derivative trading, net for the years ended December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Electricity derivative trading:		
Sales - domestic	4,017	5,292
Sales - foreign	134,083	163,456
Purchases - domestic	(3,418)	(4,864)
Purchases - foreign	(130,452)	(158,809)
Effect of hedging - currency risk hedging (Note 19.3)	(27)	(76)
Changes in fair value of derivatives	(4,246)	(4,595)
Total gains from electricity derivative trading, net	(43)	404
Other commodity derivative trading:		
Loss from gas derivative trading	(221)	(228)
Loss from oil derivative trading	(92)	(714)
Loss from coal derivative trading	(12)	(2)
Total gains and losses from commodity derivative trading, net	(368)	(540)

27. Salaries and Wages

Salaries and wages for the years ended December 31, 2016 and 2015 were as follows (in CZK millions):

	2016		2015	
	Total	Key management personnel ¹⁾	Total	Key management personnel ¹⁾
Salaries and wages including remuneration of the board members	(13,591)	(217)	(12,547)	(224)
Share options	(22)	(22)	(31)	(31)
Social and health security	(4,326)	(36)	(4,024)	(37)
Other personal expenses	(1,219)	(22)	(1,156)	(16)
Total	(19,158)	(297)	(17,758)	(308)

¹⁾ Key management personnel represent members of Supervisory Board, Audit Committee and Board of Directors of the parent company and selected managers of departments with group field of activity. The remuneration of former members of company bodies is also included in personal expenses.

At December 31, 2016 and 2015, the aggregate number of share options granted to members of Board of Directors and selected managers was 2,512 thousand and 2,391 thousand, respectively.

Members of the Board of Directors and selected managers are entitled to receive share options based on the conditions stipulated in the share option agreement. Members of the Board of Directors and selected managers are granted certain quantity of share options each year of their tenure according to rules of the share option plan. The exercise price for the granted options is based on the average quoted market price of the shares on the regulated exchange in the Czech Republic during one-month period preceding the grant date each year. Options granted could be exercised at the earliest 2 years and latest 3.5 years after each grant date. Option right is limited so that the profit per share option will not exceed 100% of exercise price and the beneficiary has to hold at his account such number of shares exercised through options granted which is equivalent to 20% of profit made on exercise date until the end of share option plan.

In 2016 and 2015 the Company recognized a compensation expense of CZK 22 million and CZK 31 million, respectively, related to the granted options.

The following table shows changes during 2016 and 2015 in the number of granted share options and the weighted average exercise price of these options:

	Number of share options			Weighted average exercise price (CZK per share)
	Board of Directors '000s	Selected managers '000s	Total '000s	
Share options at December 31, 2014	1,827	748	2,575	643.14
Options granted	550	175	725	541.45
Options exercised ¹⁾	(100)	(20)	(120)	565.54
Options forfeited	(457)	(332)	(789)	749.16
Share options at December 31, 2015 ²⁾	1,820	571	2,391	581.18
Options granted	550	185	735	423.59
Options forfeited	(390)	(224)	(614)	646.36
Share options at December 31, 2016 ²⁾	1,980	532	2,512	519.16

¹⁾ In 2015 the weighted average market share price at the date of the exercise for the options exercised was CZK 635.79.

²⁾ At December 31, 2016 and 2015 the number of exercisable options was 1,107 thousand and 988 thousand, respectively. The weighted average exercise price of the exercisable options was CZK 566.62 per share and CZK 602.30 per share at December 31, 2016 and 2015, respectively.

The fair value of the options is estimated on the date of grant using the binomial option-pricing model. Because these stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, the existing models do not necessarily provide a reliable single measure of the fair value of stock options.

At the grant dates, the underlying assumptions and the resulting fair values per option were as follows:

	2016	2015
Weighted average assumptions:		
Dividend yield	4.6%	4.2%
Expected volatility	24.1%	22.8%
Mid-term risk-free interest rate	0.3%	0.3%
Expected life (years)	1.4	1.4
Grant-date share price (CZK per share)	422.7	523.1
Weighted average grant-date fair value of options (CZK per 1 option)	36.3	36.7

The expected life of the options is based on historical data and is not necessarily indicative of the exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the actual outcome.

As at December 31, 2016 and 2015 the exercise prices of outstanding options were in the following ranges (in thousand pieces):

	2016	2015
CZK 350 – 550 per share	1,565	910
CZK 550 – 750 per share	947	1,481
Total	2,512	2,391

The options granted which were outstanding as at December 31, 2016 and 2015 had an average remaining contractual life of 1.8 years and 1.9 years, respectively.

28. Other Operating Expenses

Other operating expenses for the years ended December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Services	(11,812)	(10,502)
Travel expenses	(212)	(192)
Losses on sale of property, plant and equipment	(24)	(23)
Losses on sale of material	(66)	(11)
Capitalization of expenses to the cost of assets and change in own inventory	2,355	2,848
Fines and interest fees for delays	(20)	(353)
Change in provisions and valuation allowances *	(208)	1,689
Taxes and fees	(2,636)	(2,758)
Write-off of bad debts	(292)	(532)
Gifts	(351)	(325)
Other	(1,857)	(2,095)
Total	<u>(15,123)</u>	<u>(12,254)</u>

* In 2016 and 2015 the Group impaired its work in progress related to wind projects in Poland in the amount of CZK 671 million and CZK 9 million, respectively. The increase in the valuation allowance was caused especially due to new legislation enacted in Poland in 2016 that resulted in decrease of expected future cash flows.

Taxes and fees include the contributions to the nuclear account (see Note 20.1). The settlement of the provision for long-term spent fuel storage is accounted for at the amount of contributions to nuclear account. Settlement of provision for long-term spent fuel storage is included in Change in provisions and valuation allowances.

29. Interest Income

Interest income for each category of financial instruments for the years ended December 31, 2016 and 2015 is as follows (in CZK millions):

	2016	2015
Loans and receivables	47	50
Held-to-maturity investments	38	29
Available-for-sale investments	184	214
Bank accounts	34	95
Total	<u>303</u>	<u>388</u>

30. Other Financial Expenses

Other financial expenses for the years ended December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Derivative losses	(1,046)	(123)
Loss on sales of available-for-sale financial assets	(12)	-
Change in impairment of financial investments	(3)	-
Costs of buy back of bonds	-	(843)
Other	(203)	(144)
Total	<u>(1,264)</u>	<u>(1,110)</u>

31. Other Financial Income

Other financial income for the years ended December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Derivative gains	325	423
Gain on sales of available-for-sale financial assets	80	514
Dividend income	632	685
Refunded gift tax on emission rights	-	3,823
Other	305	211
Total	<u>1,342</u>	<u>5,656</u>

In November 2015 the Group was refunded part of the gift tax on emission allowances paid in 2011 and 2012 based on the decisions of Appellate Tax Directorate.

32. Income Taxes

Companies resident in the Czech Republic calculated corporate income tax in accordance with the Czech tax regulations at the rate of 19% in 2016 and 2015. The Czech corporate income tax rate enacted for 2017 and on is 19%. Management believes that it has adequately provided for tax liabilities in the accompanying financial statements. However, the risk remains that the relevant financial authorities could take differing positions with regard to interpretive issues, which could have a potential effect on reported income.

The components of the income tax provision are as follows (in CZK millions):

	2016	2015
Current income tax charge	(4,795)	(6,564)
Adjustments in respect of current income tax of previous periods	26	21
Deferred income taxes	16	195
Total	<u>(4,753)</u>	<u>(6,348)</u>

The differences between income tax expense computed at the statutory rate and income tax expense provided on earnings are as follows (in CZK millions):

	2016	2015
Income before income taxes	19,328	26,895
Statutory income tax rate in Czech Republic	19%	19%
"Expected" income tax expense	(3,672)	(5,110)
Tax effect of:		
Non-deductible gains and losses from derivatives	(262)	(23)
Non-deductible expenses related to shareholdings	(25)	(16)
Goodwill and other non-current assets impairment	(204)	(128)
Non-deductible fines and penalties	-	(82)
Non-deductible share based payment expense	(4)	(6)
Gift tax on emission allowances	-	726
Taxation of intercompany dividends	-	(450)
Share of profit (loss) from joint-ventures	(545)	(330)
Income already taxed or exempt	135	151
Tax credits	28	44
Gain on sale of joint-venture	31	-
Adjustments in respect of current income tax of previous periods	26	21
Effect of different tax rate in other countries	137	(154)
Change in unrecorded deferred tax asset	(344)	(717)
Other non-deductible items, net	(54)	(274)
Income taxes	(4,753)	(6,348)
Effective tax rate	25%	24%

Deferred income taxes, net, at December 31, 2016 and 2015 consist of the following (in CZK millions):

	2016	2015
Nuclear provisions	8,813	7,894
Financial statement depreciation in excess of tax depreciation	2,230	1,818
Revaluation of financial instruments	1,783	45
Allowances	1,506	1,221
Other provisions	2,316	1,648
Tax loss carry forwards	1,153	638
Other temporary differences	462	844
Unrecorded deferred tax asset	(1,126)	(782)
Total deferred tax assets	17,137	13,326
Tax depreciation in excess of financial statement depreciation	(33,229)	(31,507)
Revaluation of financial instruments	(415)	(389)
Other provisions	(527)	(602)
Other temporary differences	(1,583)	(1,250)
Total deferred tax liability	(35,754)	(33,748)
Total deferred tax liability, net	(18,617)	(20,422)
Reflected in the balance sheet as follows:		
Deferred tax assets	1,596	1,631
Deferred tax liability	(20,213)	(22,053)
Total deferred tax liability, net	(18,617)	(20,422)

Movements in net deferred tax liability, net, in 2016 and 2015 were as follows (in CZK millions):

	2016	2015
Opening balance	20,422	18,871
Deferred tax recognized in profit or loss	(16)	(195)
Deferred tax recognized in other comprehensive income	(1,732)	1,764
Acquisition of subsidiaries	(11)	-
Currency translation differences	(46)	(18)
Closing balance	18,617	20,422

At December 31, 2016 and 2015 the aggregate amount of temporary differences associated with investments in subsidiaries, for which no deferred tax liability was recognized, amounted to CZK 33,800 million and CZK 26,954 million, respectively.

Tax effects relating to each component of other comprehensive income (in CZK millions):

	2016			2015		
	Before tax amount	Tax effect	Net of tax amount	Before tax amount	Tax effect	Net of tax amount
Change in fair value of cash flow hedges recognized in equity	(7,438)	1,413	(6,025)	11,919	(2,264)	9,655
Cash flow hedges reclassified to statement of income	(1,629)	310	(1,319)	(1,954)	371	(1,583)
Cash flow hedges reclassified to assets	(85)	16	(69)	(230)	44	(186)
Change in fair value of available-for-sale financial assets recognized in equity	4,620	(10)	4,610	1,440	72	1,512
Available-for-sale financial assets reclassified from equity	(10)	2	(8)	(103)	16	(87)
Translation differences - subsidiaries	(536)	-	(536)	(1,046)	-	(1,046)
Translation differences - joint-ventures	(617)	-	(617)	(1,218)	-	(1,218)
Translation differences reclassified from equity	(127)	-	(127)	1	-	1
Share on other equity movements of joint-ventures	26	-	26	(38)	-	(38)
Re-measurement gains (losses) on defined benefit plans	10	1	11	(28)	(3)	(31)
Total	(5,786)	1,732	(4,054)	8,743	(1,764)	6,979

33. Related Parties

The Group purchases from and sells to related parties products, goods and services in the ordinary course of business.

At December 31, 2016 and 2015, the receivables from related parties and payables to related parties are as follows (in CZK millions):

	Receivables		Payables	
	2016	2015	2016	2015
Akcez Enerji A.S.	8	10	-	-
CM European Power Slovakia s.r.o. ¹⁾	-	494	-	-
ČEZ Energo, s.r.o.	48	127	11	35
in PROJEKT LOUNY ENGINEERING s.r.o.	14	13	9	9
LOMY MOŘINA spol. s r.o.	1	-	22	21
OSC, a.s.	-	-	18	32
Ústav aplikované mechaniky Brno, s.r.o.	1	1	32	24

Other	3	4	-	3
Total	20	30	48	160

¹⁾ Company was related party till November 30, 2016

Information about compensation of key management personnel is included in Note 27.

34. Segment Information

The Group reports its result using six reportable operating segments:

- Generation - Traditional Energy
- Generation - New Energy
- Distribution
- Sales
- Mining
- Other

This definition of the operating segments is a result of organizational changes in corporate governance of the Group which have been made effective since January 1, 2016. The segments are defined across the countries that CEZ Group operates in now. Segment is a functionally autonomous part of CEZ Group that serves a single part of the value chain in the energy sector and is within the purview of individual members of the ČEZ, a. s. Board of Directors. The segment information for previous periods of the year 2015 has been adjusted to provide fully comparative information on the same basis.

The Group accounts for intersegment revenues and transfers as if the revenues or transfers were to third parties, that is, at current market prices or where the regulation applies at regulated prices.

The Group evaluates the performance of its segments based EBITDA (see Note 16).

The following tables summarize segment information by operating segments for the years ended December 31, 2016 and 2015 (in CZK millions):

Year 2016:

	Gene- ration - Traditional Energy	Gene- ration - New Energy	Distribu- tion	Sales	Mining	Other	Combined	Elimina- tion	Consoli- dated
Revenues and other operating income - other than intersegment	55,728	3,389	29,698	107,432	4,826	2,671	203,744	-	203,744
Revenues and other operating income - intersegment	32,121	597	30,872	5,362	5,091	19,125	93,168	(93,168)	-
Total revenues and other operating income	87,849	3,986	60,570	112,794	9,917	21,796	296,912	(93,168)	203,744
EBITDA	21,991	3,403	20,361	5,488	4,412	2,423	58,078	4	58,082
Depreciation and amortization	(17,199)	(1,589)	(6,044)	(72)	(2,415)	(1,659)	(28,978)	-	(28,978)
Impairment of property, plant and equipment and intangible assets including goodwill	(415)	(2,703)	(5)	(2)	-	11	(3,114)	-	(3,114)

Total assets									602,686
Capital expenditure	17,514	309	9,659	68	1,776	9,246	38,572	(7,078)	31,494
Average number of employees	6,658	69	7,689	1,692	2,679	7,035	25,822	-	25,822

Prices in certain intersegment transactions are regulated by the Energy Regulatory Office (see Note 1).

The following table shows the split of revenues and other operating income according to the location of the entity where the revenues are originated (in CZK million):

	2016	2015
Czech Republic	150,884	155,917
Bulgaria	24,431	25,043
Romania	13,070	13,099
Poland	7,606	6,843
Germany	2	-
Other	7,751	9,265
Total revenues and other operating income	<u>203,744</u>	<u>210,167</u>

The following table shows the split of property, plant and equipment according to the location of entity which they belong to at December 31, 2016 and 2015 (in CZK million):

	2016	2015
Czech Republic	377,539	374,612
Bulgaria	10,322	10,019
Romania	26,212	29,389
Poland	7,229	7,343
Germany	5,592	-
Other	1	1
Total property, plant and equipment	<u>426,895</u>	<u>421,364</u>

35. Net Income per Share

	2016	2015
Numerator (CZK millions)		
Basic and diluted:		
Net income attributable to equity holders of the parent	<u>14,281</u>	<u>20,739</u>
Denominator (thousands shares)		
Basic:		
Weighted average shares outstanding	534,235	534,193
Dilutive effect of share options	<u>7</u>	<u>84</u>
Diluted:		
Adjusted weighted average shares	<u>534,242</u>	<u>534,277</u>
Net income per share (CZK per share)		
Basic	26.7	38.8
Diluted	26.7	38.8

36. Commitment and Contingencies

Investment Program

The Group is engaged in a continuous construction program, currently estimated as of December 31, 2016 over the next five years as follows (in CZK billion):

2017	30.7
2018	30.9
2019	32.5
2020	32.6
2021	34.5
Total	<u>161.2</u>

These figures do not include the expected acquisitions of subsidiaries, associates and joint-ventures, which will depend on the number of future investment opportunities, for which the Group will be a successful bidder and also considering the recoverability of these investments.

The construction programs are subject to periodic reviews and actual construction may vary from the above estimates. At December 31, 2016 significant purchase commitments were outstanding in connection with the construction program.

Insurance Matters

The Nuclear Act sets limits for liabilities for nuclear damages so that the operator of nuclear installations for energy generation purposes is liable for up to CZK 8 billion per incident. The Nuclear Act limits the liability for damage caused by other nuclear installations and activities (such as transportation) to CZK 2 billion. The Nuclear Act also requires an operator to insure its liability connected with the operation of a nuclear power plant up to a minimum of CZK 2 billion and up to a minimum of CZK 300 million for other activities (such as transportation). The Company concluded the above mentioned insurance policies with Česká pojišťovna a.s. (representing Czech Nuclear Insurance Pool) and European Liability Insurance for the Nuclear Industry. The Company has obtained all insurance policies with minimal limits as required by the law.

The Group also maintains the insurance policies covering the assets of its coal-fired, hydroelectric, CCGT and nuclear power plants and general third party liability insurance in connection with main operations of the Group.

37. Events after the Balance Sheet Date

On January 2, 2017 the Group disposed of its 100% interest in company Elektrárna Tisová, a.s. (Note 15).

In January 2017 the Company selected the winner of the tender for the sale of its housing assets in Prague Písnice. The sale is expected to take place in the first half of 2017.

These consolidated financial statements have been authorized for issue on March 20, 2017.
